DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(A) Airport name (with A in Type Column) - field owned or leased in whole by U. S. Air Force. As such, field is open to civil acft only by prior permission of C. O. thereof.

NOTE: Similar combinations of N, CG, and NG indicate the same is applicable for Navy, Coast Guard, and National Guard fields, respectively.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

* City and Airport Name - C.A.A. Int. Field, open to mil acft. "*Effingham, 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.
2. Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or *
3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.
4. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	-U.S. Air Force	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
CG	-Coast Guard	MG	-Misc. Govt.	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)
aw - allway field
(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.

NOTE: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway
5 - Instrument approach
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 73/80 oct.
F2: 73/80, 91 oct.
F3: 73/80, 91, 100 oct.

NOTE: If only 91 and/or 100 octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Army and Navy Fuel:
A+: 145 oct.
A : 100 oct.
B : 91 oct.
C : 73/80 oct.
J : JP-1

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the aircraft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) "STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) "ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for private or non-revenue producing aircraft. Very few airports charge landing fee for private aircraft. A number of fields, however, have parking fees for planes that remain over a couple of hours and which buy no services. Most of the major airports such as airline terminals have landing fees for all revenue producing aircraft. Unfortunately, we cannot indicate these in the guide.

(g) "+" indicates additional data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(i) "Rgt tfc N" indicates right turns should be made on landings and take-offs to the N.

NOTES

1. → New or revised data.
2. SCHEDULES AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least a 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS: AFB - U. S. Air Force; CGAS - Coast Guard Air Station; MCAS - Marine Corps Air Station; MCAAF - Marine Corps Aux Air Facility; NAAS - Naval Aux Air Station; NAF - Naval Air Facility; NAS - Naval Air Station; OLF - Outlying Field

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications,", and A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

✓ AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of August 28, 1947, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt., D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: March AFB, Calif MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala. ; Wash National Arpt., D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla; Wash, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Arpt., D.C., or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt., D.C.; Westover AFB, Mass., or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Arpt., D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N. 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF
			Alternate Control Towers
D...121.5			Military Emergency
	Guard D...140.58	Guard D...140.58	CAA Airways (Range Station)
E...( )	4-E...( )		Tactical or as required
		4...118.1	International airdrome control towers
F...( )	5-F...( )		Tactical or as required
G...137.70		5...143.28	General Communications
	6-G...( )	6...143.64	GCA
H...134.1	7-H...142.02		Tactical or as required
	8...134.64	7...142.02	GCA
	9...126.18	8...134.1	GCA
		9...126.18	Control Towers
U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1, 1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for a specific base. This advisory is intended for the sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.
b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'
c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37. AIR FORCE REGULATION 60-16, JULY 11, 1949".

USAF AND NAVY GCA CHANNELS: To enable U.S Navy aircraft to land at AF installations during IFR and to communicate with USAF aircraft not equipped on 121.5 mc. all USAF GCA installations will, until approximately January 1, 1950, maintain one channel on frequency 140.58 mc simultaneously with 121.5 mc. Contact with Navy GCA stations or towers by USAF aircraft should be attempted on Channel D (121.5 mc) where other standard channels do not exist. If contact cannot be made on Channel D (121.5 mc) due to lack of crystals, either in aircraft or ground installations, Channel A (140.58 mc) may be used during the interim period until crystals are available for 121.5 mc in all military installations. (11-17-49)

✓ CORRECTIONS AND AMENDMENTS TO A.N. 08-15-1: (1) USAF Air Traffic Diversion Washington, D. C. Area. Effective January 1, 1950, USAF aircraft destined for Bolling AFB on IFR Flight Plans may be diverted to Andrews Air Force Base as follows: (A) Washington ARTC may reroute USAF aircraft destined for Bolling AFB on IFR flight plan to Andrews AFB when he considers it necessary due to traffic congestion and subject to the concurrence, 30 minutes in advance, of the Bolling and Andrews AFB Operations Officers. The Bolling and Andrews Base Operations Officers are vested with the authority to exempt any USAF aircraft from the diversion procedure providing coordination is established with the Washington ARTC Controller on duty.

(a) MATS scheduled flights and all Special Air Mission Flights are automatically exempt from this diversion.

(b) Flight Service approval for change of destination from Bolling to Andrews is not necessary.

(c) If weather conditions permit VFR Flight from Andrews to Bolling, aircraft may proceed to Bolling upon receipt of approval from Andrews Approach Control or tower. Andrews Approach Control or tower will coordinate subject approval with Washington Approach Control.

(2) Correct page 120 by deleting X-Band radar ben located at Selfridge AFB, Mich., listed as S-Band (AN/CPN-8) type.

(3) Correct page 126 by changing GCA weather minimums at Quonset Point NAS, R.I. to show alt MSL 514', ceiling 500', visibility -1 mile.

CHANGES FOR A.N. 08-15-2: Correct page 4 by showing Bakersfield (Kern Co.), Calif. bearing stn to fld of KERN rdo broadcasting stn to read: 356°.

CHANGES FOR TO 08-15-3:

(1) Correct page 56 by showing Enterprise, Utah, bear and dist: 25°, 3.3 mi.

(2) Correct page 86 by showing Langley AFB, Va., procedure turn-around to be made at a heading of 327° instead of 337°.

(3) Correct page 119 by changing Pendleton, Oregon bearing stn to fld: 258°. Rng crs realigned to 056, 115, 236, 301.

(4) Correct page 83 by changing Klamath Falls, Oregon bearing and dist stn to fld: 338° 2.5 mi.

(5) Correct page 115 by changing Omaha Mun, Neb., bearing stn to fld: 139°. Rng crs realigned to 070, 154, 256, 326.

(6) Correct page 89 by changing Lawson AFB, Ga., dist stn to fld: 3.6 mi.

(7) Correct page 27 by changing Natrona Co. (Casper), Wyo., dist stn to fld: 7.7 mi.

(8) Correct page 137 by changing St. Joseph (Rosecrans), Mo., bear stn to fld: 360°.

(9) Correct page 24 by changing Buffalo, N.Y., bear stn to fld: 214°

(10) Correct page 86 by changing Lansing (Capitol), Mich., dist stn to fld: 2.6 mi.

(11) Correct page 17 by changing Beaumont (Jefferson Co.), Tex., dist stn to fld: 3.6 mi.

(12) Craig AFB, Ala., correct by changing initial approach altitudes to the following: NE 2000' (Int S leg BHM). SE-2000' (Int SW leg MXF). SW-2000' (Int N leg PNS). NW-2000' (Int SW leg BHM). Delete Min Alt authorized from NW of 1200' (Int W leg MXF). Missed approach procedure: Proceed out NW leg climbing to 2000' within 25 mi of stn. Low cone: 1000'. Remarks: Holding procedure on SW leg due to Green 6 Montgomery and Mobile and Blue 3 Montgomery to Birmingham. Complete procedure turn within 10 mi at minimum altitude of 1200', within 15 mi at 1700'.

(13) Correct page 53 by changing Ellensburg, Wash., (Bowers Fld), initial approach alt from 8-6500' (Int NW leg YKM). Missed Approach procedure: If contact not established within 3 mi, turn left and climb to 7000' on E leg. Climb to 5500' within 10 mi.

(14) Correct page 94 by changing Lynchburg, Va., (Preston Glenn), Low Cone to: 1940'.

(15) Correct page 102 by changing Millinocket, Maine ceiling over airport: 600'. (delete asterisk). Change Min Alt: 1004' (delete asterisk). *Delete Approved for DC-3 and smaller aircraft only.

(16) Correct page 48 by deleting Dillon, Mont., procedure inasmuch as this is no longer a CAA Intermediate Field or P Field.

(17) Andrews AFB, make procedure turn within 25 miles at min alt of 1500'. Low cone: 1200'. Min alt over airport: 900'. Missed approach procedure: Proceed to NE leg, climbing to 1500'. REMARKS: Aircraft remain E of N and S legs Andrews range during letdown.

NOTE: The following correct data carried in Airman's Guide Vol. 4, No. 21: Mag bearing and/or distance station to field as follows:

(a) Page 28, Chanute AFB, Ill.: 3.4 miles.

(b) Page 56, Enterprise, Utah: 250°, 3.3 miles

(c) Page 86, Langley AFB, Va.: 109°, 3.5 miles.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations. (1-31-50)

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

✓ MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine air-ground communications installations are being discontinued.

NAVY AND USAF GCA CHANNELS: See item under Air Force Special Notices, entitled, "USAF and Navy GCA Channels".

CIVIL SPECIAL NOTICES

✓ S.C. 31-"AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control", are available at the RTCA Secretariat, Room 109, 1724 F Street N. W., Washington 25, D. C.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, CAA, Washington 25, D.C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide. District Airport Engineer addresses are listed in the Notices to Airmen section.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof..

✓ LORAN CHART WARNING: Due to changes in Loran information the following U.S.A.F. Loran Charts are hazardous. All stock on hand should be destroyed:

LS103, edition 1, dated July 1949; LS104, edition 1R, dated February 1949; LN2, edition 2, dated July 1949; LN3, edition 1, dated April 1949; LN4, edition 1R, dated May 1949.

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, Coast Guard aircraft.

Under the present Air Force expansion program, the Air Force is activating or reactivating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

Note: Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

NEW YORK-CHICAGO VOR AIRWAY: This airway operates on an experimental basis. Aircraft equipped to use VOR facilities may be cleared to conduct flight on the New York-Chicago VOR airway.

Standard operating procedures for VHF omniranges (VOR) during the transition period when both VOR and low-medium frequency ranges are in use have been developed. These procedures contain the phraseologies which will be used by air traffic controllers in clearing flights to operate via the VOR facilities. A chart of the New York-Chicago VOR airway has been prepared by the Coast and Geodetic Survey. Copies of the procedures and the chart may be obtained from either the New York or the Chicago CAA Regional Office.

✓ CAA CONTROL TOWERS RE-ESTABLISH CONTINUOUS GUARD ON 3117.5 KC: All CAA control towers now stand continuous guard on 3117.5 kc.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 126.7 MC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations on April 1, 1950. Beginning September 1, 1949, the installation of a receiving watch on 126.7 mc, airline enroute frequency, by CAA airway communications stations was started. Effective November 1st, all CAA stations guard 126.7 mc.

FREQUENCY UTILIZATION PLAN 108-132 MC:

108.1 thru 111.9 mc: [1]AIR NAVIGATION AIDS: Instrument landing localizer with simultaneous radiotelephone channel.
112.1 thru 117.9 mc: AIR NAVIGATION AIDS, airway track guidance (ranges).
118.1 thru 121.3 mc. AIR TRAFFIC CONTROL COMMUNICATIONS, ground to air
121.5 mc: [2-4]EMERGENCY.
121.7, 121.9 mc: [3]AIRPORT UTILITY, Simplex or Crossband.
122.1, 122.3 mc: PRIVATE AIRCRAFT ENROUTE - Air to Ground.
122.5 thru 122.9 mc: PRIVATE AIRCRAFT TO TOWERS - Air to Ground.
123.1 thru 123.5 mc: FLIGHT TEST AND FLYING SCHOOLS (Shared), Simplex.
123.7 thru 125.5 mc: APPROACH CONTROL - Air to Ground.
125.7 thru 126.5 mc: AIR CARRIER - Aircraft to Towers.
126.7 mc: AIR CARRIER - Aircraft to Airways Stations.
126.9 thru 131.9 mc: AIR CARRIERS ENROUTE, Simplex.
132.1 and higher: GOVERNMENT.

General Note: The above utilization plan when fully implemented contemplates crossband communications except in the case of

"Air Carriers Enroute" communications which will be on a simplex basis, and "Airport Utility" communications which may be either crossband or simplex. The target date for full implementation is July 1, 1950. Simplex communications will be permitted during this interim period in those cases where equipment in use will not permit crossband. It is expected that implementation of crossband operation will commence immediately.

[1]The frequencies 111.1 thru 111.9 mc have a secondary use in the U.S. as airway communications channels.

[2]The military will use 140.58 mc in the interim period and will authorize its use by other aeronautical services.

[3]Power and antenna height shall be restricted to the minimum to achieve the required service.

[4]No carrier frequency closer than 150 kc to the emergency frequency in the VHF aeronautical frequency band should be assigned.

PROPOSED DISCONTINUANCE OF 111.1 MC BY AIRWAY COMMUNICATIONS STATIONS DEFERRED: Proposed discontinuance of 111.1 mc transmitting frequency by CAA Airway Communications Stations has been deferred. All pre-advertised discontinuances by Airway Communications Stations should be disregarded.

CAA AIRWAY COMMUNICATIONS STATION DISCONTINUE USE OF 116.1 MC: Effective September 1, 1949, with the discontinuance of 116.1 mc in the continental United States by the National Military Establishment, CAA Airway Communications Stations discontinued transmitting on and guarding of that frequency.

Substituted therefore is 140.58 mc for communication between military aircraft and CAA Airway Communications Stations. Military stations and aircraft use 121.5 mc, the international VHF emergency frequency for their emergency frequency.

NOTE: 140.58 mc should not be used by any civil aircraft. It is intended solely for military aircraft use.

NON-COMMISSIONED VHF OMNIRANGES: Because the asterisk previously prefixing on-test or non-commissioned omniranges was not sufficiently noticeable, it has been dropped and replaced by the following phrase in the last two columns of the Air Navigation Radio Aids listing: "NON-COMM", for non-commissioned.

✓ CORRECTIONS TO FLIGHT INFORMATION MANUAL Vol. 4, No. 1: Correct page 56 by showing longitude of Boca Raton, Fla., AFB as 80-06-00.

Correct page 31 by showing telephone number for Baltimore, Md., Dundalk 0867.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct C. & G.S. Route Chart # 2208, dated December 6, 1949 by showing Findlay, Ohio, Omnirng at 40-53-43, 83-48-08.

Correct C & G.S. Chattanooga, Tenn., Sectional Chart dated, August 2, 1949, by deleting the word "Omni" above box denoting Knoxville, Tenn Low Frequency Rng.

Correct C. & G.S. Rdo Facility Charts 7 and 8 by showing Minimum en route instrument alt between The Dalles, Oregon and Pendleton, Oregon as 4000'.

Correct C. & G.S. Rdo Facility Chart No. 29, dated December 7, 1949 by changing class for Hanksville Rdo Rng as BVAR-VDPL.

Correct C. & G.S. Instrument Approach Chart-Range, AL 553, dated September 26, 1949 Spokane, Spokane, Wash., rdo rng course designations listed under Initial Approach data as follows: NE, E, SW, W.

✓ DESIGNATION AND REDESIGNATION OF CIVIL AIRWAYS AND COMPULSORY REPORTING POINTS: Effective February 7, 1950 Civil Airways and Reporting Points are amended in whole or in part as follows:

CIVIL AIRWAYS:

Blue Airway No. 41 (New York, N. Y. to U. S. Canadian Border). Change Concord, Mass to read Concord, N. H. wherever it appears in the designation.

COMPULSORY REPORTING POINTS:

Green Airway No. 9 (Hawaiian Islands), is added to read, Intsxn of the S crs of the Port Allen, T.H., rng and the SW crs of the Honolulu, T.H., rdo rng; intsxn of the SE crs of the Port Allen, T.H., rdo rng and SW crs of the Honolulu, T.H., rdo rng; Honolulu, T.H., rdo rng stn; intsxn of the N crs of the Maui, T.H., rdo rng and the NE crs of the Honolulu, T.H., rdo rng; intsxn of the N crs of the Hilo, T.H., rdo rng and the NE crs of the Honolulu, T.H., rdo rng.

Amber Airway No. 10 (Hawaiian Islands), is added to read intsxn of the S crs of the Honolulu, T.H., rdo rng and the W crs of the Hilo, T.H., rdo rng.

Amber Airway No. 11 (Hawaiian Islands), is added to read intsxn of the S crs of the Maui, T.H., rdo rng and the W crs of the Hilo, T.H., rdo rng.

Amber Airway No. 12 (Hawaiian Islands), is added to read Hilo, T.H., rdo rng stn; intsxn of the E crs of the Maui, T.H., rdo rng and the N crs of the Hilo, T.H., rdo rng.

Red Airway No. 87 (Hawaiian Islands), is added to read intsxn of the NW crs of the Port Allen, T.H., rdo rng and a point 100 mi NW of the Port Allen, T.H., rdo rng stn; Port Allen, T.H., rdo rng stn; Maui, T.H., rdo rng stn; intsxn of the E crs of the Maui, T.H., rdo rng and the E crs of the Hilo, T.H., rdo rng.

REPORTING POINTS: Effective immediately the following On-Request Reporting Points are established. (1) Bethany (BTH) Intsxn of N crs Oklahoma City, Okla., rng and W crs Tinker, Okla., rng.

(2) Seymour -Intsxn of SW crs Ottumwa, Iowa, (VAR) rng and NW crs Kirksville, Mo., (LF) rng.

(3) Bedford -Intsxn of E crs St. Joseph, Mo., rng and NE crs Kansas City, Mo., rng.

(4) Hamilton - Intsxn of E crs St. Joseph, Mo., rng and S crs Des Moines, Iowa, rng.

(5) Fillmore -Intsxn of N crs Camarillo, Calif., rng and E crs Santa Barbara (LF), rng.

(6) Catalina -Intsxn of SE crs of Camarillo, Calif., rng and S crs Los Angeles (VAR) rng.

(7) Pt. Mugu -Intsxn of S crs Camarillo, Calif., rng and SE crs Santa Barbara (VAR), rng.

Effective immediately the following On-Request Reporting Points are deleted, since realignment of certain facilities has eliminated them: (1) Eudora -Intsxn of S crs St. Joseph, Mo., rng and SW crs of Kansas City, Mo., rng.

(2) Braymer -Intsxn of E crs St. Joseph, Mo., rng and NE crs Kansas City, Mo., rng.

(3) Kingston- Intsxn of E crs St. Joseph, Mo., rng and S crs Des Moines, Iowa, rng.

✓ POSITION REPORTING: The safety and effectiveness of air traffic control depend to a large extent on accurate position reporting by pilots. In order to provide proper separation and expedite aircraft movements. ATC must be able to make accurate estimates of the progress of every aircraft operating on an IFR flight plan. Unless pilots make all required position reports promptly and accurately, it is difficult for controllers to compute the actual and future positions of flights, sometimes with the result that traffic conflictions cannot be accurately foreseen. An error of even one minute in position reporting can result in delays or in separation which is less than the required minimum.

In making en route position reports, pilots should ensure that their time setting is correct and that the time of passing a reporting point is given to the nearest minute. Care should also be taken that the reporting point is identified correctly. When an aural or light-panel indication is used to determine the time of passing a reporting point such as a fan marker, Z marker, cone of silence, or intersection of range courses, the time should be noted when the signal is first received and again when it ceases. The mean of the two times should then be taken as the actual time over the fix. If position is given with respect to distance and direction from a reporting point, the distance and direction should be computed accurately.

In connection with position reporting, attention is directed to the fact that a change in true airspeed constitutes a change in flight plan. As such, a proposed variation in true airspeed must be reported to ATC.

✓ ARTC AND FLIGHT ADVISORY AREA BOUNDARY REVISIONS: Effective Feb. 15, 1950, the Albuquerque Flgt Advisory Area will be relocated as follows: Beginning at a point 25 mi NE of the Silver Lake rdo rng on Amber Airway 2 extending eastward along lat. 35-30-00N to 112 degrees W, thence direct to the four-corner state bndry of New Mexico, Utah, Colorado and Arizona. Concurrent with the above change the Albuquerque Ctl Area boundary will be relocated on Blue Airway 67 at a point 50 mi N of the Needles, Calif., rdo rng, on Red Airway 15 at a point 80 mi SE of the Las Vegas, Nev., rdo rng. The Albuquerque-Los Angeles Flight Advisory Area Boundary will begin at lat. 35-30-00N, Long. 115-00-00W and extend southward along present boundary.

✓ ADDITIONAL BOUNDARY REVISIONS: See Page 73.

DANGER AREA DESIGNATIONS: The following Danger Area amendment will be effective on February 13, 1950, unless otherwise advised:

AMENDMENT NO. 25

(1) The Sebring, Florida, area is amended to read: Location: Avon Park (Miami Chart) Description: Beginning at lat. 27-44-27N, Long. 81-15-19W; SE to lat 27-40-50N, long. 81-11-12W; due S to lat. 27-40-15N; due E to long. 81-10-31W; due S to lat. 27-38-28N; due E to long. 81-08-22W; southerly along the Kissimmee River to lat. 27-32-29N, long. 81-11-50W; due W to long. 81-20-50W; northerly along Arbuckle Creek to Lake Arbuckle and along the E and N shore of Lake Arbuckle to lat 27-42-21N, long. 81-25-20W; NW to lat. 27-42-36N, long. 81-26-09W; due N to lat. 27-42-59N; due W to long. 81-26-24W; due N to lat. 27-43-12N; due W to long. 81-26-39W; due N to lat. 27-44-27N; due E to lat 27-44-27N, long. 81-15-19W, point of beginning. Altitudes: Surface to 50,000 ft. Time: Daylight hours only. Using Agency MacDill Air Force Base, Tampa, Florida. (2) A Peason Ridge, Louisiana, area is added to read: Location: Peason Ridge (Beaumont Chart). Description: N boundary: lat 31-24-00N; E boundary: long. 93-10-00W; S boundary: lat. 31-19-30N; W boundary: long. 93-20-30W. Altitudes: Surface to 25,000 ft. Time: 0800 to 1700, daily. Using Agency: Barksdale Air Force Base, Shreveport, Louisiana. (3) The Wilmington, Ohio, listing is amended by changing the Using Agency column to read: Air Force All Weather Flying Center, Wright-Patterson AFB, Dayton, Ohio. (4) The Underhill, Vermont, listing is amended by changing the Time of Designation column to read: Continuous. NOTE: The latest Flight Information Manual, now going to press, and dated February 1, 1950, contains all Danger Areas as were effective on this date. For current Danger Area information through Amendment No. 24, see above named publication.

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat., Long.	Change in Weather Service
Perry, Ohio		Hourly report discontinued
Norfolk, Neb.		3-hourly reports to be discont.
McCamey, Texas (McCamey Arpt)	31-08, 102-14	SW to be available soon
Lubbock, Texas (Reese AFB)		Pibal made available

THE PILOT WEATHER REPORTING PROGRAM

New joint procedures for the handling of pilot reports of weather conditions observed in flight have been developed by the Weather Bureau and the Civil Aeronautics Administration.

Pilot reports of weather conditions are especially needed to help fill in the gaps in the present weather observing network. The weather observer on the ground often needs the help of pilots to determine weather conditions aloft. All pilots can help by promptly reporting unexpected or hazardous weather conditions observed in flight to the nearest CAA Communications Station by radio or to the nearest Weather Bureau Office upon landing.

Pilot weather reports now receive wide distribution. Some of the uses made of the reports are indicated below:

THE AIRPORT TRAFFIC CONTROL TOWER uses the reports to expedite the flow of air traffic in the vicinity of the field and also forwards reports to other interested offices.

THE CAA AIRWAYS COMMUNICATIONS STATION broadcasts the reports so that other airmen may benefit from them.

THE LOCAL WEATHER BUREAU OFFICE uses the reports in briefing other pilots and in forecasting.

THE CAA AIR ROUTE TRAFFIC CONTROL CENTER uses the reports to expedite the flow of air traffic over the civil airways and to determine most favorable flight altitudes.

THE WEATHER BUREAU FLIGHT ADVISORY WEATHER SERVICE finds pilot reports very helpful in issuing advisories of hazardous weather conditions to aircraft in flight. This office also uses the reports to brief other pilots, and in forecasting.

THE AIRLINE RADIO STATION makes reports available to flight dispatchers and airline meteorologists.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary conditions cannot be given immediate coverage in the "Airman's Guide", but Teletype Notam service gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Old Post Office Bldg., Montgomery, Ala.

ANNISTON ARPT: Ctn, strip extensions in progress. Equip on fld. (12-14)

BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15)

FT. MORGAN AIRFLD: Ctn, grading. (1-13)

LANETT-VALLEY ARPT: E/W Strip clsd, freshly graded, soft. (12-7)

★MAXWELL AFB (MONTGOMERY)-RADIO: USAF VHF/DF no longer opers on VHF freqs 137.88, 126.18 mc. (1-25)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17)

MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern sector within 20° E and W mag. north where severe course indicator roughness is present. (1-20)

ARIZONA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 707-1/2 W. Thomas Road, Phoenix, Arizona.

★DAVIS-MONTHAN AFB (TUCSON)-RADIO: Correct coordinates USAF X-band radar bcn: lat 32-11-02, long. 110-53-05. (1-18)

DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (12-29)

DOUGLAS-RADIO: LF rng figt-checked, courses correctly aligned. (1-18)

FLAGSTAFF: Demolition opers in progress approx 5 mi W, daily, Mon thru Fri. Danger up to 10,000' MSL in area bounded as follows: N-Hwy 66; E-Riordan, Ariz.; S-Sycamore Canyon; W - Garland Prairie.

GILA BEND-RADIO: LF rng figt-checked, courses correctly aligned. (1-25)

GILA BEND AF AUX: All obsts except 208' twr 1/2 mi S of fld not lgtd. (12-8)

PHOENIX: Exten trng on Phoenix Rng on all courses except W. (11-2)

PHOENIX-SKY HARBOR ARPT-TOWER: Effect Dec 15, 1949, CAA ILS was shut down until approx March 25, 1950. (1-9) About Feb 1, apch ctl will be placed in effect. Class will be: AC. (1-17) About Feb 1, compass locator operg on 245 kc, ident: "PH" will be comm at OM site. Will oper on gnd-check only. (1-27) FLD: Rnwys 8L-26R and 17-35 clsd. 2-way rdo rqrd on Rnwys 8R-26L and 3-21. Rdo rcvr rqrd on all other lndg areas. Nordo crop dusters rstd to use of dirt mat area. (12-15) Rnwy 12-30 shortened to 4000' due to const on NW end, mrkd day, ngt. (1-17)

★TUCSON-RADIO: Jan 23, 1950, Red Rock FM on NW course decomm. Jan 19, LF rng figt-checked, courses correctly aligned. (1-19)

WINSLOW ARPT-TOWER: CAA ILS glide path shut down - unreliable. (12-5)

YUMA COUNTY ARPT: Clsd ngts. Rnwys 8-26 and 3-21 open with ctn advised at intsxns of Rnwy 17-35. Rnwy 17-35 clsd, const. Ctn, holes and hvy equip along rnwy. Bcn inop. (12-14) (1-31-50)

ARKANSAS: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Adams Field, P. O. Box 1397, Little Rock, Ark.
EL DORADO-GOODWIN ARPT: N/S Rnwy lgts inop. (1-30)
FORT SMITH-RADIO: VHF omnirng on 113.1 mc unreliable. (10-15)
FORT SMITH ARPT: Asphalt portion W end E/W Rnwy unsafe for acft of twin-eng size or larger. (11-3) 680' extension on W end E/W Rnwy under const. Equip on fld days. (12-1)
SEARCY ARPT: Gully 1' deep lctd 300 yds from S end across N/S Strip. (12-15)
TEXARKANA-RADIO: VHF omnirng radials 8 mi out from stn, course roughness and mild bends. (11-16) About Feb 27, stn lctn mrkr will be shut down until approx Mar 3 - modification. (1-9)
WALNUT RIDGE-RADIO: LF rng courses aligned by gnd-check only. (11-3) VHF omnirng operg on 115.7 mc normally from gnd observation only. Ctn advised until flgt-checked. (12-20)

CALIFORNIA: SPECIAL NOTICE: The addresses of the CAA District Airport Engineers are: (So. of Fresno) 5651 W. Manchester Ave., Los Angeles 45, Calif.; (Fresno & North) 206 Appraisers Bldg., 630 Sansome St., San Francisco 11, Calif.
ALAMEDA NAS: Maint high apch on Rnwys 26L and 21, hvy acft parked these areas. (8-15)
ALTURAS MUN ARPT: All rnwys clsd, snow. (1-17)
ALTURAS MUN #1 ARPT: Use at own risk, drifting snow. (1-17)
BLUE CANYON INT FLD: Clsd (snow). (1-3)
BRAWLEY ARPT: NW/SE Strip and tie down area N of hangar under const. Use rnwy mrkd by white discs and bndry lgts. (12-30)
BURBANK-LOCKHEED AIR TERMINAL-TOWER: CAA ILS lclzr and OMK operg on test basis only. Lclzr freq: 109.5 mc, channel X, lctd 150' W of W end of E/W rnwy. Ident: "BUR". OMK freq 359 kc, ident: "BU", lctd 4.44 mi W of W end E/W rnwy (on back course lclzr). (10-4) FLD: Clsd to all trans P-80 acft except on special projects for modification. (11-15)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft shall oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CAMP PENDLETON OLF (OCEANSIDE): Trans acft clear thru MCAS El Toro. (10-5)
CASTLE AFB (MERCED): Use only Rnwy 12-30, acft parked on lndg mat. (12-22)
COSO JUNCTION ARPT: E/W Strip under const. (1-13)
DAGGETT-RADIO: LF range flgt-checked, courses correctly aligned. (1-17)
EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C.G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (8-31)
EL CENTRO NAAS: All rnwy lgts inop. Rnwy lgts 3-21 avail on req. Const on rnwys. (12-20)
★EL TORO MCAS.-RADIO: Rng on 440 kc is off when transmitting voice communs. (1-24)
EUREKA-HUMBOLDT CO. ARPT: Equip on fld intermittently day, ngt. Ditch on W side NW/SE Taxiway filled but extremely soft. 6' unlgtd jet FIDO unit 800' from SE end Rnwy 31, 200' E rnwy center line. Use rnwys, taxiways only. (1-10)
FAIRFIELD-SUISUN AFB-RADIO: USAF rng operg normally; multiples and splits beyond 25 mi. (12-1)
FAIRFIELD-SUISUN AFB-TOWER: USAF ILS inop.
FRESNO-RADIO: VHF omnirng on 112.9 mc, gnd-checked only. (9-27)
HAWTHORNE ARPT: Equip on N side Rnwy 9-27. (12-15)
HAYWARD ARPT: Const, equip on fld days. Taxiway lgts discont during const. (1-6)
HOLLISTER ARPT: All rnwy lgts inop. (1-24)
★LOS ANGELES-CENTRAL ARPT-TOWER: CI twr now oper 1200 to 1/2 hr after sunset. (1-24) These data rcvd too late for inclusion on ANRA page.
LOS ANGELES INTERNATIONAL ARPT-TOWER: CAA ILS operg from temp lctn 1700' W of W end of rnwy 25L. Course aligned to center of rnwy 25L and is normal by flgt-check.
** Lclzr back course not usable. (11-7) FLD: Jan 18, 1950, slope line hi-intensity apch lgt system aligned on Rnwy 25L comm and opers dusk to dawn. Present neon apch lgts will be discontd but will be avail on req. Single white lines 50' from rnwy edge indicates 200' usable width of Rnwy 7R-25L - equip adj to single white lines installing lgts. Rnwy 4-22 open to taxying only. Equip 1000' out on apch to Rnwys 7L, 7R. Equip W end Rnwy 25R, const. Use paved areas only. (1-18)

CALIFORNIA: ★MARCH AFB (RIVERSIDE)-RADIO: USAF VHF/DF hours of oper: 0800-1700 daily Mon-Fri. (1-25)
MARCH AFB (RIVERSIDE): Inten inst trng in AT-6 acft days Mon thru Fri. Rnwy 7-25 clsd, parked acft. (12-29)
McCLELLAN AFB (SACRAMENTO): Rnwy 4-22 clsd, parked acft. (12-28)
MOFFETT NAS (MTN VIEW)-RADIO: Navy VHF/DF unreliable. (1-6)
MOFFETT NAS (MTN VIEW): Fld on positive ctl. (8-15)
MOUNT LAGUNA-RADIO: Effect. Feb 24, 1950, voice commun and rdo rcvg grds will be discont. H fac will remain in cont opern. Class: HW. (1-26)
OAKLAND ARPT: Rnwy 6-24 rstd to lndg and take-off of lgt acft and taxying by all acft. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft lndg gravel area 27, lnd beyond white line. (1-6)
PASO ROBLES-SHERWOOD ARPT: NW/SE Rnwy ruf at intsxn NE/SW Rnwy. Water standing on NW/SE Rnwy wet weather. Lnd short when using NW/SE Rnwy. (1-6)
REEDLEY-GREAT WESTERN ARPT: 20' extreme SSE end of lndg strip very ruf. (11-16)
SACRAMENTO-RADIO: Auto. rng course monitor device temp decomm. (4-14)
SACRAMENTO ARPT-RADIO: Soon, CAA ILS will be operg on test-basis and will serve NE/SW rnwy with apch from SW. Lclzr freq: 109.9 mc. Ident: "SAC". OMK freq: 308 kc. MMK freq: 263 kc. Glide path freq: 333.8 mc. Disregard spurious signals. (12-27) FLD: Equip on fld days. (11-13)
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. (11-2)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (3-4)
**SAN DIEGO NAS SEAPLANE BASE: 2 lndg lanes. Fuel: A+ BCJ. (12-15)
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6)
SAN FRANCISCO ARPT-TOWER: CAA ILS lclzr unreliable daylgt hrs due to arpt const in vicinity of transmitter. (12-6) FLD: Turf area clsd. (12-6)
STOCKTON-RADIO: About Feb 5, 1950, VHF stn lctn mrkr will be comm at rng site. Class will be: BMRLZ-DTV. (1-24)
UKIAH-RADIO: Jan 28, 1950, VHF omnirng on 112.3 mc operg cont on non-comm basis without voice feature until about March 30. Lctd lat 39-03-13, long. 123-16-24. Ident: "UKI". Class: VORW-TV. (1-28)
VAN NUYS-METROPOLITAN ARPT: Equip along edges of rnwys. (1-28)
VICTORVILLE AFB: Clsd, Sat, Sun and holidays. (10-4)

COLORADO: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Stapleton Airfield, Denver 7, Colo.
AKRON-RADIO: Jan 25, voice communs on LF and VHF omnirng will be inop until approx Feb 2 - relctn of equipment. During this period LF and VHF rngs will be unmonitored.
DENVER-RADIO: About Feb 13, voice communs on LF and VHF visual-aural rng will be inop until approx Feb 17 - relctn of equipment. During this period LF and VHF visual-aural rng will be unmonitored. (1-26)
DENVER-STAPLETON ARPT: Rnwy 8L-26R clsd to acft larger than DC-3. (11-9)
LA JUNTA MUN ARPT: Ctc lgts on E/W Rnwy being repaired. (11-9)
PUEBLO: Ordnance depot lctd approx 17 mi E at lat 38-16-53, long. 104-18-09 is conducting all types of demolition work 0800-1630 MST daily thru Jan. 1950. (12-29)
PUEBLO ARPT-TOWER: Rcvg freq on 122.5 mc inop at CI twr. (1-6)
TRINIDAD ARPT: Administration Bldg being constd N side of fld. (1-9)
**WEST FLD (GOLDEN): New fld. Lat 39-44-15, long. 105-10-45. (1-23)

CONNECTICUT: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 2200 U. S. Custom House, Boston 9, Mass.
BRIDGEPORT ARPT: After hvy rains pools of water 3 to 4" deep on Rnwy 6-24. (1-9)
E. HARTFORD-RENTSCHLER ARPT: VFR flgt test opers days all alts in 75 mi radius. (1-9)
HARTFORD-RADIO: VHF omnirng on 114.9 mc shut down - relctn. (6-25)
WILLIMANTIC-WINDHAM ARPT: Const off ends all rnwys. Equip on fld. (12-2)
**WINDSOR LOCKS-CONNECTICUT VALLEY SEAPLANE BASE: ABANDONED. (1-20)

DELAWARE: SPECIAL NOTICE: The address of the CAA District Airport Engineer is P.O. Box 2031, New Castle County Airport, Wilmington 99, Delaware.
NEW CASTLE, BCN SITE 65, ATL-LGA: About Feb. 14, 1950, 24" 6 rpm bcn, 2 red course lgts and lgtd windcone at lat 39-39-47, long. 75-35-15 will be discont. (1-23)

(1-31-50)

[redacted]: WASHINGTON-SPECIAL NOTICE: The CAA regards the Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac Riv.

WASHINGTON-RADIO: USAF National MEW radar transmits and grds on req: 126.18, 137.88, 142.38, 134.1 mc; transmits and grds cont: 137.7, 121.5 mc. (11-25)

★WASHINGTON-RADIO: Correct courses: 32 A 140 N 214 A 309 N. This correct Airgi Vol. 4, No. 22, dated Jan. 17, 1950. LF rng usable dist is 65 mi. Lgt multiples all courses beyond 30 mi. SE course has slight bend to NE at 30 to 40 mi. (1-13) Jan 15, Mt. Vernon, Va., FM placed in oper on test basis at MHW site, on SW course, ident changed to three dashes. (1-27)

WASHINGTON NATIONAL ARPT-SPECIAL NOTICE: All military fighter type and all civil fighter type acft are prohibited from using Washington Nationa Arpt.
NOTE: As a general rule, all acft with prefix "P" or "F" are banned and those with prefix "B" are permitted to use fld. (11-21)

WASHINGTON NATIONAL ARPT: USAF: Use of this arpt by USAF acft prohibited except for: (a) Scheduled MATS tfc. (b) Lndgs and take-offs necessary for overseas flgts using customs and immigration clearance facs of aerial port of embarkation. (c) Flgts transporting VIP and General Officers above grade of Major General. Acft utilizing fld under above rstn shall not exceed 120,000 lbs. gross wt without expressed prior approval of arpt director. Fighter type acft are excluded from use of this fld.
NAVY: Clsd to all Navy acft except the following: (a) Acft carrying civilian VIP and officers ABOVE rank of Major General and Rear Admiral. (b) Regularly scheduled MATS and logistic support wing flgts. (c) Flgts rqrg customs and immigration services. Acft utilized not to exceed 120,000 lbs. gross wt without prior approval arpt director. All Navy acft cleared to this fld taxi to MATS terminal N of Administration Bldg.
COAST GUARD: Clsd to all CG acft except the following: (a) Acft carrying civilian VIP and officers of the rank of Rear Admiral or above. (b) Logistic support flgts with prior approval of arpt director (necessity for such flgts to be cleared with Comdt., CG and to be conducted under VFR conditions only.) (c) Detachment acft hangared at WNA. All CG acft cleared to this fld, taxi to CG Hangar #6 S of Administration Bldg.
GENERAL: 2-way rdo rqrd. Stay on paved areas, shoulders soft. Lgtd 168' elevator being erected approx 2 mi S (180°T). Equip on fld. Weather Bureau advised it will be conducting exper observations approx 50' S apch end Rnwy 36 when ceiling 600' or lower and/or visibility 1.5 mi or less. Ceiling balloons will be used during daylgt hrs and sealed beam ceiling lgt durg darkness. Generator lctd approx 500' W Rnwy 18-36 and 400' N of Taxiway 2, bounded by Taxiways 1, 2, and 8 and Rnwy 18-36. 46' boom working in apch lane to Rnwy 36 to the water's edge from 3000' out. U.S. Air Force advises no mil hooded inst flgts will be made within 25 mi radius of DCA National Arpt except that practice runs allowed at Andrews Air Force Base with definite radar ctc only. (12-29)

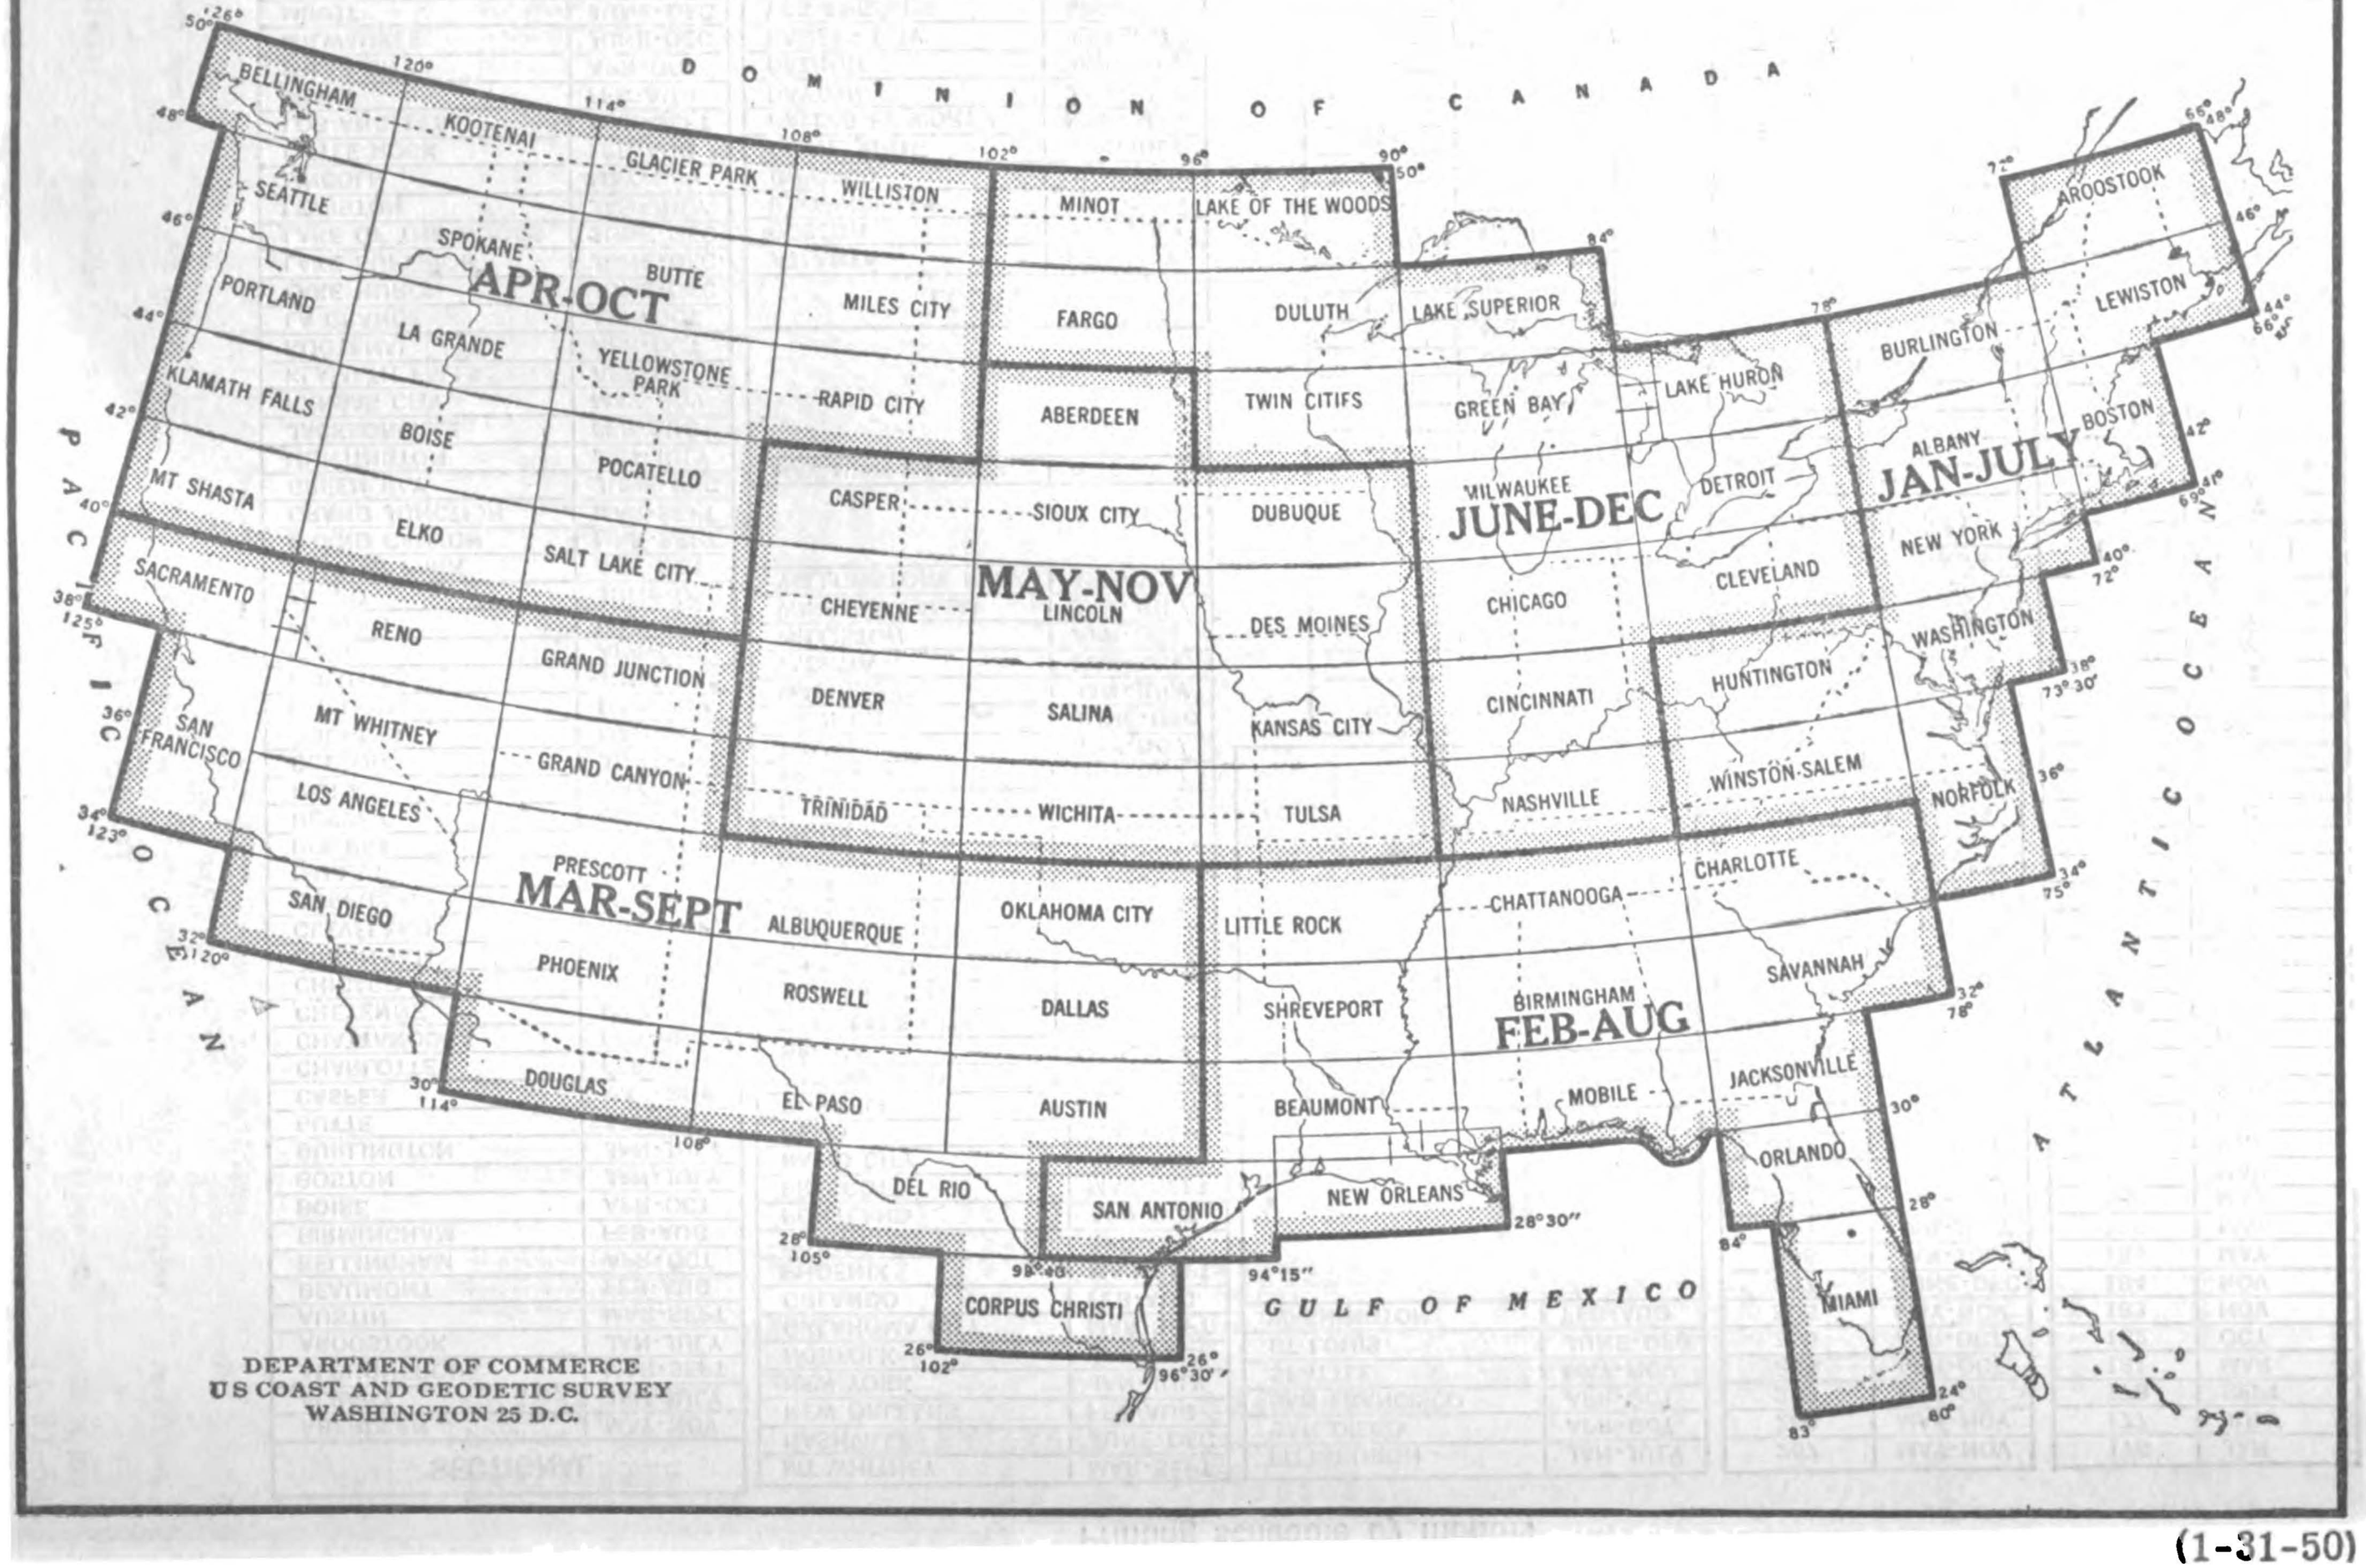
PRINTING SCHEDULE FOR SECTIONAL AERONAUTICAL CHARTS



(1-31-50)

AIRMAN'S GUIDE

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

FEB 27 1950
LIBRARY

SPECIAL NOTICE

AIRPORT TOWER CALL-UPS:

Itinerant pilots with L.F. receivers should bear in mind that Airport Traffic Control Towers transmit on low frequencies other than 278 Kcs. Check the latest issue of the Airman's Guide or call by radio to the nearest INSAC for the correct Tower frequency and avoid confusion.

GUIDE

DIRECTORY OF AIRPORTS	Pages 1 through 55
RADIO FACILITY DATA	Pages IV through XIX
NOTICES TO AIRMEN	Pages 56 through 76

VOL. 4, NO. 24 . . FEBRUARY 14, 1950

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS AIR FORCE AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Air Force towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A) = Air Force Facility. G.P. = Glide Path. L7=Hi-intensity approach lgts. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation. MMK's, < OMK's are at the same locations as the middle and outer markers unless otherwise specified. → New or revised data. + =additional data will be found in Notices To Airmen section (2-14-50)

AIR NAVIGATION RADIO AIDS

VHF RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicates by parenthetical (2). Category III= Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE; Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900.
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue hemisphere; (Y) = Yellow hemisphere
→ = New or revised data.

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N", aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC . . . Approach Control Tower, CAA
B . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . Control Tower, CAA
CA . . Control Tower, Air Force
CI . . . Control Tower (City, County, Private, etc.)
CN . . . Control Tower, Navy
D . . . Distantly controlled
FM . . VHF fan marker (100 watts)

GCA . . . Ground Controlled approach system
H . . . . Non-directional radio beacon (homing), power 50 watts or more
ILS . . Instrument Landing System (voice on localizer channel)
IM . . . VHF boundary marker
L . . . . L/MF (200 - 415 kc) voice facility on other than range frequency.
LFM . . . VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH . . Non-directional radio beacon (homing) power less than 50 watts
ML . . Range (loop radiators), power less than 50 watts
MM . . VHF middle marker
MMK . . Compass locator station when combined with middle marker of ILS.
MOR . . . Low frequency omni-directional range.
MRA . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL . . Range (loop radiators), power 50 or more, but less than 150 watts.
OM . . . VHF outer marker
OMK . . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P . . . . Point-to-Point radio
RA . . . Range (adcock, vertical radiators), power 150 watts or more.
RL . . . Range (loop radiators), power 150 watts or more.
S . . . . Simultaneous (range signals and voice) type of transmitter.
T . . . . Teletype
TX . . . Principal teletype
V . . . Additional VHF voice feature on other than range frequency.
VAR . . . Visual-aural VHF range
VOR . . . Visual omni-directional VHF range
W . . . . Without voice facilities
Z . . . . VHF station location marker at a range station

FREQUENCY LEGEND

= Guards same VHF frequencies station transmits
(1) = 3105. 4495 kc Guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105, 4495, 3117.5 kc; 122.1, 126.7, 140.58 mc. This group of frequencies is group generally guarded by INSACS.
NOTE: (3) -3117.5 kc = guards every frequency in (3) except 3117.5 kc.
(3) ,6210 kc = guards every frequency in group (3) plus 6210 kc.

1. - The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. - Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all C.A.A. INSACS April 1, 1950. INSAC with associated tower does not guard 3117.5 kc except when tower inoperative.
3. - Range courses are magnetic in-bearings.
√ = New facilities or name changes, see page XIX.
+ = Additional data will be found in Notices to Airmen Section.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(A) Airport name (with A in Type Column) - field owned or leased in whole by U. S. Air Force. As such, field is open to civil acft only by prior permission of C. O. thereof.

NOTE: Similar combinations of N, CG, and NG indicate the same is applicable for Navy, Coast Guard, and National Guard fields, respectively.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

* City and Airport Name - C.A.A. Int. Field, open to mil acft. "*Effingham 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.
2. Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or *
3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.
4. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	-U.S. Air Force	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
CG	-Coast Guard	MG	-Misc. Govt.	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)
aw - allway field
(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.
NOTE: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway
5 - Instrument approach
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs
NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 73/80 oct.
F2: 73/80, 91 oct.
F3: 73/80, 91, 100 oct.

NOTE: If only 91 and/or 100 octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Army and Navy Fuel:
A+: 145 oct.
A : 100 oct.
B : 91 oct.
C : 73/80 oct.
J : JP-1

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the aircraft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) "STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) "ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for private or non-revenue producing aircraft. Very few airports charge landing fee for private aircraft. A number of fields, however, have parking fees for planes that remain over a couple of hours and which buy no services. Most of the major airports such as airline terminals have landing fees for all revenue producing aircraft. Unfortunately, we cannot indicate these in the guide.

(g) "+" indicates additional data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(i) "Rgt tfc N" indicates right turns should be made on landings and take-offs to the N.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least a 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications,", and A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

✓ AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt., D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA:March AFB,Calif MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala. ; Wash National Arpt., D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla;Wash, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Arpt., D.C., or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt., D.C.; Westover AFB, Mass., or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Arpt., D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N. 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

✓ CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF Alternate Control Towers
D...121.5			Two-way International Emergency Frequency
	Guard D...140.58	Guard D...140.58	CAA Airways (Range Station)
E...( )	4-E...( )		Tactical or as required
		4...118.1	International airdrome contro towers
F...( )	5-F...( )		Tactical or as required
		5...143.28	General Communications
G...137.70		6...143.64	GCA
	6-G...( )		Tactical or as required
H...134.1	7-H...142.02	7...142.02	GCA
	8...134.64	8...134.1	GCA
	9...126.18	9...126.18	Control Towers
U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for a specific base. This advisory is intended for the sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.

b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'.

c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

USAF AND NAVY GCA CHANNELS: To enable U.S. Navy aircraft to land at AF installations during IFR and to communicate with USAF aircraft not equipped on 121.5 mc, all USAF GCA installations will, until approximately January 1, 1950, maintain one channel on frequency 140.58 mc simultaneously with 121.5 mc. Contact with Navy GCA stations or towers by USAF aircraft should be attempted on Channel D (121.5 mc) where other standard channels do not exist. If contact cannot be made on Channel D (121.5 mc) due to lack of crystals, either in aircraft or ground installations, Channel A (140.58 mc) may be used during the interim period until crystals are available for 121.5 mc in all military installations. (11-17-49)

✓ CHANGES FOR PILOTS SPECIAL JET HANDBOOK: (1) Bergstrom AFB, Austin, Tex. correct by changing minimum altitude to 2500' MSL in both procedures.

(2) Scott AFB, Belleville, Ill.: Correct by raising weather minimums to 3000' on all procedures.

(3) Westover AFB, Chicopee Falls, Mass.: Correct by raising weather minimum to 5000'. Make initial approach 15,000' or 500' on top, whichever is lower.

(4) Castle AFB, Merced, Calif.: Correct by raising weather minimum to 3000'.

(5) Pyote AFB, Pyote, Tex.: Correct by raising weather minimum to 4000'.

(6) Barksdale AFB, Shreveport, La.: Correct by raising weather minimum to 2500' on all procedures.

(7) Connally AFB, Waco, Tex: Correct by raising weather minimum to 2000'.

✓ CORRECTIONS AND AMENDMENTS TO A.N. 08-15-1: AND FOREIGN RADIO FACILITY CHARTS: Correct Airman's Guide, Vol. 4, No. 23, by deleting the following call-signs at Military AACS's:

CONTINENTAL UNITED STATES
- Dow AFB
- Grenier AFB
- Davis Monthan AFB
- Kirtland AFB
- Orlando AFB

U.S.A.F.E.
- Athens AFB, Greece
- Ankara, Turkey
- Burtonwood, England
- Erding Air Depot
- Erbenhein

PACIFIC THEATER
- Eniwetok

FAR EAST AIR FORCES
- Itami AFB, Osaka
- Matsushima Airdrome, Sendai
- Miho, Honshu

CARIBBEAN AIR COMMAND
- France AFB
- Vernam AFB

NORTH ATLANTIC AREA (MATS)
- McAndrew AFB
- Pepperrell AFB
- Prince Christian Sound

U.S.A.F.E
- Fassberg
- Fritzlar
- Furstenfeldbruck
- Horshing
- Nuebiberg
- Oberpaffenhofen
- Rhein-Main
- Vienna

(CANADIAN DATA): (1) Correct page 2 by showing Vancouver VHF/Direction finder operating on 121.5 mc only; hours of operating: On request 24 hours notice. Call sign: Sea Island Homer.

(2) Correct page 24 by showing St. Hubert RCAF gnd/air station discontinued.

Correct page 24 by adding Arnprior, Ont., twr transmitting 206, 3027.5, 116.1, 126.18, and 117.36. Receiving 116.1 and 117.36 mc on req. Gdg 3027.5, 3195, 6210, and 126.18 Hours of opern: 1400Z-2200Z, Mon to Fri. Operated by RCAF detachment.

(3) Correct page 26 by showing Dartmouth gnd/air station call sign as "CGQ".

Correct page 26 Greenwood, N. S. Ctl twr no longer gdg 139.14 mc. Twr opers continuously. VHF/DF opers on half hour notice.

✓ CHANGES FOR TO 08-15-2: (1) Correct page 3 by changing bearing and dist rdo broadcasting stn WSFA at Montgomery (Maxwell) to read 305°, 6.0 mi.

✓ CHANGES FOR TO 08-15-3 AND PHACUS: (1) Scott AFB, Ill.: Correct by changing remarks to read, "Hold within 10 mi of range stn on SW leg only."

(2) Forbes AFB, Kans.: Procedure cancelled. Delete.

(3) Laramie (Brees Fld), Wyo.: Correct by changing initial apch alt to: NW- 11,000' (Int E leg SIR).

(4) Austin (Robert Mueller), Tex.: Correct by changing initial apch alt to: SE-Min En route Alt. Delete Min Alt Authorized after passing marker or int from SW.

(5) Correct page 59, Fairfield-Suisun AFB by deleting indication of East-West rnwy as being available. This rnwy is permanently closed.

(6) Springfield, Ill. (Capital Arpt).: Correct by deleting obstruction 931' located SE of arpt.

(7) Otis AFB, Mass, correct with the following additional ADF procedure authorized for use: Utilizing Otis Homer, Freq 269 kc, ident: AUA. Initial apch from Providence rdo rng stn out E leg at 2000'. Shuttle: NE of homer courses of 230° and 50°. Final apch leg: 230°. Procedure turn: To left after 1 min from homer, within 10 miles at min alt of 1200'. Low cone: 615' Min alt over arpt: 615'. Dist, homer to arpt: 0 mi. If landing not accomplished or ground contact not established within 5 mi after passing homing facility, proceed out 270° leg, and climb to 2000'. Min ceiling: 500'. Remarks: Apch from E leg of Providence rng to Otis homer system now in use by Central Instrument School. H facility operates on request only and automatic upon receipt of IFR clearances. Otis control twr must be called as soon as contact can be made, requesting operation of H facility.

(8) Beaumont, Tex.: Correct by showing dist, stn to fld: 3.6 mi.

(9) Buffalo, N. Y.: Correct by showing bearing, stn to fld: 214°.

(10) Casper (Natrona Co.), Wyo.: Correct by showing dist, stn to fld: 7.7.

(11) Daggett, Calif.: Correct by showing N and S courses aligned at 148 and 320°.

(12) Kansas City, Mo.:(Fairfax Arpt).: Correct by changing initial apch alt from SW to 2000' (Int S leg STJ).

(13) Kansas City, Mo., (Municipal): Correct by changing initial apch alt from SW to 2000' (Int S leg STJ).

(14). Klamath Falls, Oreg.: Correct bearing and distance, stn to fld: 338°, 2.5 mi.

(15) Langley AFB, Va.: Correct by showing procedure turn-around to be made at a heading of 327° instead of 337°.

(16) Lansing, Mich.: Correct by changing distance stn to fld to 2.6 mi.

(17) Lawson AFB, Ga.: Correct distance, stn to fld: 3.6 mi.

(18) Mitchel AFB, N. Y.: Correct by showing ceiling over airport: 515', min alt 600'.

(19) Ogden, Utah (Municipal): Correct by showing (Procedure 1), Shuttle: N course 10,000 min (Procedure turn W).

(20) Omaha, Neb.: Correct bearing stn to fld: 139°.
(21) Pendleton, Oreg.: Correct bearing, stn to fld: 258°.
(22) Pittsburgh, Pa.: Correct by showing Min Alt authorized after passing marker or int from W to 2000' (Cecil FM - Final).
(23) St. Joseph, Mo.: Correct bearing, stn to fld: 360°.
(24) Tucson, Ariz.: Correct by deleting Red Rock FM from NW leg.
(25) Washington, D. C.: Correct by showing NW leg of range at 140°.
(26) West Palm Beach, Fla.: Correct by changing initial apch alt from N to 1500' ,Int SW leg MLB).
(27) Whidbey Island NAS, Wash.: Correct by showing Min alt over fld: 867'.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine air-ground communications installations are being discontinued.

NAVY AND USAF GCA CHANNELS: See item under Air Force Special Notices, entitled, "USAF and Navy GCA Channels".

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, CAA, Washington 25, D. C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide. District Airport Engineer addresses are listed in the Notices to Airmen section.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

S.C. 31 - "AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control", are available at the Secretariat, Room 109, 1724 F Street N. W., Washington 25, D. C.

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, Coast Guard aircraft.

Under the present Air Force expansion program, the Air Force is activating or reactivating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

Note: Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

NEW YORK-CHICAGO VOR AIRWAY: The airway operates on an experimental basis. Aircraft equipped to use VOR facilities may be cleared to conduct flight on the New York-Chicago VOR airway.

Standard operating procedures for VHF omniranges (VOR) during the transition period when both VOR and low-medium frequency ranges are in use have been developed. These procedures contain the phraseologies which will be used by air traffic controllers in clearing flights to operate via the VOR facilities. A chart of the New York-Chicago VOR airway has been prepared by the Coast and Geodetic Survey. Copies of the procedures and the chart may be obtained from either the New York or the Chicago CAA Regional Office.

CAA CONTROL TOWERS RE-ESTABLISH CONTINUOUS GUARD ON 3117.5 KC: All CAA control towers now stand continuous guard on 3117.5 kc.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 126.7 MC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations on April 1, 1950. A continuous receiving watch on 126.7 mc, airline en route frequency is now stood by all CAA airway communications stations.

(2-14-50)

PROPOSED DISCONTINUANCE OF 111.1 MC BY AIRWAY COMMUNICATIONS STATIONS DEFERRED: Proposed discontinuance of 111.1 mc transmitting frequency by CAA Airway Communications Stations has been deferred. All pre-advertised discontinuances by Airway Communications Stations should be disregarded.

CAA AIRWAY COMMUNICATIONS STATION DISCONTINUE USE OF 116.1 MC: Effective September 1, 1949, with the discontinuance of 116.1 mc in the continental United States by the National Military Establishment, CAA Airway Communications Stations discontinued transmitting on and guarding of that frequency.

Substituted therefore is 140.58 mc for communication between military aircraft and CAA Airway Communications Stations. Military stations and aircraft use 121.5 mc, the international VHF emergency frequency for their emergency frequency.

NOTE: 140.58 mc should not be used by any civil aircraft. It is intended solely for military aircraft use.

NON-COMMISSIONED VHF OMNIRANGES: Because the asterisk previously prefixing on-test or non-commissioned omniranges was not sufficiently noticeable, it has been dropped and replaced by the following phrase in the last two columns of the Air Navigation Radio Aids listing: "NON-COMM", for non-commissioned.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct C. & G.S. WAC Chart # 406, Albuquerque, N. Mex., by spotting Cutter-Carr No. 2 Airport at lat 35-07-00, long. 103-37-00, 3.6 mi NE.

Correct C. & G.S. Rdo Facility Chart #45, dated Nov. 30, 1949, to show the Blythe Omni-Directional Facility as being located at lat 33-35-12, long. 114-47-06.

Correct C. & G.S. Rdo Facility Chart #26A dated, Jan. 4, 1950, to show Elizabeth, N. J., and Linden, N. J., MHW Facilities as operating continuously.

Correct C. & G.S. Rdo Facility Chart #59, dated Oct. 19, 1949, to read bearing of the Miami, Fla., VOR from stn to airport 83°.

Correct C. & G.S. Rdo Facility Chart #10, dated Dec. 14, 1949, to read bearing of the Casper, Wyo., BVOR to Natrona County Airport 240°.

Correct C. & G.S. Route Chart 2208 to show Toledo VOR.

✓ ON-REQUEST REPORTING POINTS: Effective immediately the following On-Request Reporting Points are established. (1) Atlanta, Georgia VAR Rdo Rng. (2) Campbellton, Georgia LF Rdo Rng. (3) Atlanta, Georgia Navy LF Rdo Rng.

✓ ARTC BOUNDARY REVISIONS: Effective Feb. 7, 1950 the following ARTC Boundaries were established:

Chicago-Cincinnati Boundary: Blue 34, 15 mi NW of the intsxn of the N crs of Terre Haute, Ind., and the SE crs of Rantoul (Chanute), Ill., AFB. Blue 42, 15 mi N of Kokomo, Ind., H Facility.

POSITION REPORTING: The safety and effectiveness of air traffic control depend to a large extend on accurate position reporting by pilots. In ordor to provide proper separation and expedite aircraft movements, ATC must be able to make accurate estimates of the progress of every aircraft operating on an IFR flight plan.

Unless pilots make all required position reports promptly and accurately, it is difficult for controllers to compute the actual and future positions of flights, sometimes with the result that traffic conflictions cannot be accurately foreseen. An error of even one minute in position reporting can result in delays of in separation which is less than the required minimum.

In making en route position reports, pilots should ensure that their time setting is correct and that the time of passing a reporting point is given to the nearest minute. Care should also be taken that the reporting point is identified correctly.

When an aural or light-panel indication is used to determine the time of passing a reporting point such as a fan marker, "Z" marker, cone of silence, or intersection of range courses, the time should be noted when the signal is first received and again when it ceases. The mean of the two times should then be taken as the actual time over the fix. If position is given with respect to distance and direction from a reporting point, the distance and direction should be computed accurately.

✓ INSTRUMENT APPROACH PROCEDURES: (1) Forbes (Topeka), Kans., Forbes AFB - The low frequency rdo rng porcedure for this fld was CANCELLED, effective Jan. 20, 1950.

(2) Smoky Hill (Salina), Kans., Smoky Hill AFB - The low frequency and very high frequency procedures for this field were CANCELLED, effective Feb. 1, 1950.

✓ DANGER AREA DESIGNATIONS: The following Danger Area amendment will be effective Feb. 14, 1950, unless otherwise advised:

AMENDMENT NO. 26

Ajo, Arizona (Phoenix Chart) - area is added to read: Description: Beginning at lat. 32-49-30, long. 112-45; due S to lat. 32-31; due W to long. 112-57; due S to lat. 32-30; due W to long. 113-30; due N to lat. 32-35; due E to long. 113-27; due N to lat. 32-48-40; ENE to lat. 32-49-30, long. 113-21; due E to point of beginning. Altitudes: Surface to unlimited. Time: Hours of daylight, 7 days a week, Feb. 14, 1950 to May 14, 1950, inclusive. Using Agency: 81st Fighter Wing, Kirtland AFB, Albuquerque, N. Mex.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary conditions cannot be given immediate coverage in the "Airman's Guide", but Teletype Notam service gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Old Post Office Bldg., Montgomery, Ala.
ANNISTON ARPT: Ctn, strip extensions in progress. Equip on fld. (12-14)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two hi-intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15)
★BROOKLEY AFB (MOBILE)-RADIO: USAF GCA fac is on trng status; hrs of oper: Cont during IFR; 0800-1600 Mon thru Fri; 30 min notice other hrs. (2-11) These data rcvd too late for inclusion on ANRA page.
CRAIG AFB (SELMA): Ext inst trng conducted on Craig rng 0800 to 1700 during IFR conditions. (2-6)
FT. MORGAN AIRFLD: Ctn, grading. (1-13)
JASPER-WALKER CO. ARPT: NW/SE Strip under const. (1-30)
LANETT-VALLEY ARPT: E/W Strip clsd, freshly graded, soft. (12-7)
MAXWELL AFB (MONTGOMERY)-RADIO: About Feb 17, NE course will be realigned to 160°. (2-6)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17)
MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern sector within 20° E and W mag. north where severe course indicator roughness is present. (1-20)
[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 707-1/2 W. Thomas Road, Phoenix, Arizona.
DAVE-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (12-29)
FLAGSTAFF: Demolition opers in progress approx 5 mi W, daily, Mon thru Fri. Danger up to 10,000' MSL in area bounded as follows: N - Hwy 66; E - Riordan, Ariz.; S - Sycamore Canyon; W - Garland Prairie.
GILA BEND AF AUX: All obsts except 208' twr 1/2 mi S of fld not lgtd. (12-8)
GOODYEAR AF AUX (WILLIAMS AUX): Student trng during daylgt hrs only. (1-26)
PHOENIX: Exten trng on Phoenix Rng on all courses except W. (11-2)
★PHOENIX-SKY HARBOR ARPT-TOWER: Effect Dec. 15, 1949, CAA ILS was shut down until approx March 26, 1950. (1-9) FLD: Rnwys 8L-26R and 17-35 clsd. 2-way rdo rqrd on Rnwys 8R-26L and 3-21. Rdo rcvr rqrd on all other indg areas. Nordo crop dusters rstd to use of dirt mat area. (12-15) Rnwy 12-30 shortened to 4000' due to const on NW end, mrkd day, ngt. (1-17)
WINSLOW ARPT-TOWER: CAA ILS glide path shut down - unreliable. (12-5)
[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Adams Field, P. O. Box 1397, Little Rock, Ark.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Austin	Little Rock	Washington	Atlanta local
Beaumont	Mobile	WAC 410	FC 227
Birmingham	New Orleans	WAC 466	
Chattanooga	San Antonio	WAC 525	
Del Rio	Shreveport	23DF	

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

NEW EDITIONS

NEW CHART

AL 661	Wilkes-Barre, Pennsylvania	Wilkes-Barre-Scranton Airport	January 6, 1950.

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the dates of the Latest Prints of Instrument, Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.

(2-14-50)

SPECIAL NOTICE

YOUR VFR FLIGHT PLAN IS TRANSMITTED - Before taking off on a VFR cross-country, advise your destination airport you are coming by filing a flight plan with the nearest CAA Airway Communications Station. This station will transmit the flight plan to the communications station at your destination.

When you change your destination en route, always notify the original destination point as soon as you land.

You can file the flight plan in person, by telephone, or by radio. Because of radio congestion, however, the CAA requests that you normally file in person or by telephone.

The CAA offers this VFR flight plan transmission service primarily to promote safety by continually and accurately accounting for your aircraft. Thus, if you have two-way radio, you may report to each communications station over which you pass, in addition to advising the communications station at your destination of your arrival.

If you have filed a flight plan, immediately notify the nearest CAA Airway Communications Station when you land. If you don't, an unwarranted and expensive search and rescue procedure will be inaugurated. So, while the CAA encourages you to file a flight plan, you should assure the flight plan service's effectiveness by being sure to close your flight plan after landing.

SPECIAL NOTICE

TWO MORE AIDS FOR AIRMEN

Two aids to airmen--listing of airports where weather information is available, and a list of the frequencies guarded by CAA communications stations and towers--have recently been added to the bi-weekly "Airman's Guide". The changes and additions have been made on the basis of a recent survey in which subscribers to the Guide discussed its content and value.

In addition, the February 1, 1950, Flight Information Manual, which complements the Guide, includes a tabulation of Danger Areas. Information on Danger Areas will include their location, the times when they are activated, which ones may be flown over, above certain minimum altitudes, and to whom requests for permission to fly over or land should be directed.

CAA Administrator Rentzel recently pointed out that the Airman's Guide besides being an in-flight and pre-flight reference publication, enables the cross-country flier to bring his aeronautical charts, issued every six months, up-to-date.

This is true, the Administrator stated, because the Airman's Guide lists in every two weekly issue an average of 20 airport abandonments, 23 new airports, and 450 changes in airport servicing, lighting and other facilities.

To increase the factor of safety in cross-country flight the Administrator, therefore, repeatedly has requested all fliers to study the Guide before take-off. It is posted on all airport bulletin boards. Individual fliers desiring personal copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. The subscription price, covering 26 issues of the Guide and two issues of the Flight Information Manual, is $6.00 a year.

(2-14-50)

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS AIR FORCE AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Air Force towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A) = Air Force Facility. G.P. = Glide Path. L7=Hi-intensity approach lgts. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation. MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified. → New or revised data. + =additional data will be found in Notices To Airmen section (2-28-50)

AIR NAVIGATION RADIO AIDS

VHF RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicates by parenthetical (2). Category III= Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE; Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900.
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue hemisphere; (Y) = Yellow hemisphere
→ = New or revised data.

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N", aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC . . . Approach Control Tower, CAA
B . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . Control Tower, CAA
CA . . Control Tower, Air Force
CI . . . Control Tower (City, County, Private, etc.)
CN . . . Control Tower, Navy
D . . . Distantly controlled
FM . . VHF fan marker (100 watts)

GCA . . . Ground Controlled approach system
H . . . . Non-directional radio beacon (homing), power 50 watts or more
ILS . . Instrument Landing System (voice on localizer channel)
IM . . . VHF boundary marker
L . . . . L/MF (200 - 415 kc) voice facility on other than range frequency.
LFM . . . VHF fan marker, low powered (5 watts, not over 10 miles from range
MH . . Non-directional radio beacon (homing) power less than 50 watts
ML . . Range (loop radiators), power less than 50 watts
MM . . VHF middle marker
MMK . . Compass locator station when combined with middle marker of ILS.
MOR . . . Low frequency omni-directional range.
MRA . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL . . Range (loop radiators), power 50 or more, but less than 150 watts.
OM . . . VHF outer marker
OMK . . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P . . . . Point-to-Point radio
RA . . . Range (adcock, vertical radiators), power 150 watts or more.
RL . . . Range (loop radiators), power 150 watts or more.
S . . . . Simultaneous (range signals and voice) type of transmitter.
T . . . . Teletype
TX . . . Principal teletype
V . . . . Additional VHF voice feature on other than range frequency.
VAR . . Visual-aural VHF range
VOR . . . Visual omni-directional VHF range
W . . . . Without voice facilities
Z . . . . VHF station location marker at a range station

FREQUENCY LEGEND

* = Guards same VHF frequencies station transmits
(1) = 3105, 4495 kc Guarded
(2) = 3105, 4495, 3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105, 4495, 3117.5 kc; 122.1, 126.7, 140.58 mc. This group of frequencies is group generally guarded by INSACS.
NOTE: (3) -3117.5 kc = guards every frequency in (3) except 3117.5 kc.
(3), 6210 kc = guards every frequency in group (3) plus 6210 kc.

1. - The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. - Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all C.A.A. INSACS April 1, 1950. INSAC with associated tower does not guard 3117.5 kc except when tower inoperative.
3. - Range courses are magnetic in-bearings.
✓ = New facilities or name changes, see page XIX.
+ = Additional data will be found in Notices to Airmen Section.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(A) Airport name (with A in Type Column) - field owned or leased in whole by U. S. Air Force. As such, field is open to civil acft only by prior permission of C. O. thereof.

NOTE: Similar combinations of N, CG, and NG indicate the same is applicable for Navy, Coast Guard, and National Guard fields, respectively.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

* City and Airport Name - C.A.A. Int. Field, open to mil acft. "*Effingham 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.
2. Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or * .
3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.
4. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	-U.S. Air Force	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
CG	-Coast Guard	MG	-Misc. Govt.	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.

NOTE: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting
- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 73/80 oct.
F2: .73/80, 91 oct.
F3: 73/80, 91, 100 oct.

NOTE: If only 91 and/or 100 octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Army and Navy Fuel:

A+: 145 oct.	C : 73/80 oct.
A : 100 oct.	J : JP-1
B : 91 oct.	

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the aircraft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) "STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the Liquidation Service of General Services Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) "ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for private or non-revenue producing aircraft. Very few airports charge landing fee for private aircraft. A number of fields, however, have parking fees for planes that remain over a couple of hours and which buy no services. Most of the major airports such as airline terminals have landing fees for all revenue producing aircraft. Unfortunately, we cannot indicate these in the guide.

(g) "+" indicates additional data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(i) "Rgt tfc N" indicates right turns should be made on landings and take-offs to the N.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least a 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS: AFB - U. S. Air Force; CGAS - Coast Guard Air Station; MCAS - Marine Corps Air Station; MCAAF - Marine Corps Aux Air Facility; NAAS - Naval Aux Air Station; NAF - Naval Air Facility; NAS - Naval Air Station; OLF - Outlying Field

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications,", and A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla., Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt., D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: March AFB, Calif MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala. ; Wash National Arpt., D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla; Wash, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Arpt., D.C., or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt., D.C.; Westover AFB, Mass., or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Arpt., D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N. 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF Alternate Control Towers
D...121.5			Two-way International Emergency Frequency
	Guard D...140.58	Guard D...140.58	CAA Airways (Range Station)
E...( )	4-E...( )		Tactical or as required
		4...118.1	International airdrome control towers
F...( )	5-F...( )		Tactical or as required
		5...143.28	General Communications
G...137.70		6...143.64	GCA
	6-G...( )		Tactical or as required
H...134.1	7-H...142.02	7...142.02	GCA
	8...134.64	8...134.1	GCA
	9...126.18	9...126.18	Control Towers
U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1, 1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for a specific base. This advisory is intended for the sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.

b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'.

c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

✓ DISCONTINUANCE OF 140.58 MC., CHANNEL A, AS GCA FREQUENCY: Effective March 1, 1950, Air Force GCA grequency 140.58 mc (channel A) will be discontinued.

✓ CORRECTIONS AND AMENDMENTS TO AN 08-15-1: AND FOREIGN RADIO FACILITY CHARTS: The following information regarding changeover in call signs at Military Airways Stations supersedes information published in Airman's Guide Vol 4, No. 23 dated Jan. 31, 1950 and Vol. 4, No. 24 dated Feb. 14, 1950:

(Canadian Data): (1) Correct page 26, Summerside, P.E.I. VHF/direction finder hrs of optn: 0800-1700 Mon thru Fri and on req.

✓ CHANGES FOR TO 08-15-3 AND PHACUS: (1) Correct page 142, San Diego (Lindbergh Field), Calif., by changing min alt after passing Oceanside FM from N to 2500'. Dist. stn to fld: 2.3 mi. San Diego NAS. Elev: 25'. Visual contact from Lindbergh Fld to San Diego NAS 186°, 2.0 mi.

(2) Correct page 43, Hensley Fld (Dallas), Tex., is hereby cancelled and following procedure is authorized and should be substituted therefor: Hensley NAS (Dallas), Tex., Initial Apch Alt: N -2000' (Int N leg Fort Worth (Marietta FM); E -2000' (Int NW leg Tyler); S -1900' (Int N leg Waco (Waxahachie FM)); W -2100' (Int S leg Fort Worth). Min Alt authorized after passing marker or int: N -1700' (Int E leg Ft. Worth); S-1200' (Duncanville FMHW (Final)). Shuttle: None. Final Apch Leg: S. Complete procedure turn on E side S leg within 10,15,20 and 25 mi -1700'. Low Cone: 1200'. Bearing and Dist rng stn to Love Fld: 356°, 2.2 mi. Ceiling: 600'. Fly visual contact from Love Fld to Hensley NAS, bearing and dist: 211°, 9.2 mi. Missed Apch Procedure: If not visual contact at Love Fld, climb to 2000' on right (east) side of N leg within 25 mi. Remarks: If unable to maintain visual contact en route Hensley Fld, or if landing not accomplished, climb to 2000' on a heading of 211° and advise Dallas Apch Ctl.

(3) Tinker AFB, Okla., chart should be overprinted or stamped with notation: "Approved for rdo compass letdown (ADF)."

(4) Houston (Ellington AFB), Tex., correct by adding remarks: Maintain 1600' inbound on final apch until crossing Houston FM.

(5) Correct page 83, Kelly AFB, Tex., by changing control twr freq to read 317 kc.

(6) Correct page 121, Pendleton, Oreg., by changing initial apch alt to W -4000' (The Dalles Rng Stn); NW -5000' (YKM Rng Stn). Change min alt authorized after passing Marker or Int: E 2500' (Int SW leg ALW) (Final); and delete min alt authorized after passing Marker or Int from NW. Low Cone: 2400'. Missed apch procedure: Climb to 4000' on W leg within 25 mi.

(7) Correct page 134, Reno, Nev., Shuttle: N crs 10,000' within 25 mi. Missed apch procedure: Make immediate left turn and climb to 9000' on N leg within 20 miles.

(2-28-50)

(8) Smyrna AFB, Tenn., the following instrument apch procedure has been authorized utilizing new MRLW rng, lctd Lat. 35-59-34N, Long. 86-30-76W, Freq 391 kc, ident: SYM. Initial apch alt: NE - 3500' (Int NW leg SMV); SE - 4000' (Int S leg SMV and SE leg BNA); SW-2500' (Int NE leg MSL); NW- 2500' (BNA rng stn). Shuttle: SE leg. Final Apch leg: SE leg. Complete procedure turn on E side SE leg within 10,15 mi at 2500'; 20 and 25 mi at 3500'. Low Cone: 1020'. Magnetic Bearing and dist: 320', 6.8 mi. Ceiling over airport: 500'. Min alt over airport: 1012'. Missed apch procedure: Climb to 3500' on NE leg. Remarks: Inst Instrument apches cleared and controlled by Nashville apch control. Rng opers 0800 - 1700, 30 min notice other hours.

(9) Bolling AFB, Washington, D. C., utilizing Washington rdo rng with same initial apch alt, final apch leg, procedure turn and procedure turn alts and low cone as authorized for Washington National Airport. Bearing and dist rdo rng to Bolling AFB is 10°, 4.9 mis. Min alt over airport: 800'. Missed apch procedure: Proceed our NE leg climb to 2000' and hold in an elliptical pattern 2 min SW of Riverdale, alternate plan as directed by Washington National apch control. Remarks: Danger area adjacent to airway apch approx 32 mi S of rng on W side of Quantico MCAS.

✓ CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 8, AF Regulation 5-12.

GROUP I MATERIAL: II-B-2, Movement and Control Messages, July 1, 1948, II-B-3, Notices to Airmen, First Edition May 1, 1949 with one revision; Contractions. Fourth Edition, Dec 1, 1949; Location Identifiers, Third Edition, Sept 15, 1948, with 16 supplements.

GROUP II MATERIAL: II-B-5, Airways Air-Ground Communications. Second Edition, Sept 1, 1948, with two revisions.

GROUP III MATERIAL: II-B-7, Landline Operating Procedures, April 15, 1945.

GROUP IV MATERIAL: Civil Airways Mileage Chart of July 27, 1949.

GROUP V MATERIAL: Service "A" Manual, May 28, 1949 with four revisions; Service "C" Manual Jan 24, 1950; Teletype Maps: M-10, Jan 1, 1949; M-11, Dec. 1, 1949; M-13, June 15, 1948; and M-16, July 1, 1948.

GROUP VI MATERIAL: Teletype Maps: Drawing M-58, April 1, 1949; Drawing M-59, Jan 5, 1949.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U.S Navy Hydrographic Office. Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities. operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 15-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine air-ground communications installations are being discontinued.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or miror changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, CAA, Washington 25, D. C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide. District Airport Engineer addresses are listed in the Notices to Airmen section.

✓ AIRPORT TOWER CALL-UPS Itinerant pilots with L. F. receivers should bear in mind that Airport Traffic Control Towers transmit on low frequencies other that 278 kcs. Check the latest issue of the Airman's Guide or call by radio to the nearest INSAC for the correct Tower frequency and avoid confusion.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

(2-28-50)

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil Airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment, or lease, thereon. Those prefixed by (N) have a Navy (Air) servicing detachment or lease, thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, Coast Guard aircraft.

Note: Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

CIVIL USAGE OF MILITARY GCA UNITS: Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the commanding officer of the fields having such units. CAA-established civil ceiling and visibility minimums of 400 feet and 1 1 mile respectively are mandatory, except in emergency.

NEW YORK-CHICAGO VOR AIRWAY: This airway operates on an experimental basis. Aircraft equipped to use VOR facilities may be cleared to conduct flight on the New York-Chicago VOR airway.

Standard operating procedures for VHF omniranges (VOR) during the transition period when both VOR and low-medium frequency ranges are in use have been developed. These procedures contain the phraseologies which will be used by air traffic controllers in clearing flights to operate via the VOR facilities. A chart of the New York-Chicago VOR airway has been prepared by the Coast and Geodetic Survey. Copies of the procedures and the chart may be obtained from either the New York or the Chicago CAA Regional Office.

CAA CONTROL TOWERS RE-ESTABLISH CONTINUOUS GUARD ON 3117.5 KC: All CAA control towers now stand continuous guard on 3117.5 kc.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 126.7 MC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations on April 1, 1950. A continuous receiving watch on 126.7 mc, airline en route frequency is now stood by all CAA airway communications stations.

PROPOSED DISCONTINUANCE OF 111.1 MC BY AIRWAY COMMUNICATIONS STATIONS DEFERRED: Proposed discontinuance of 111.1 mc transmitting frequency by CAA Airway Communications Stations has been deferred. All pre-advertised discontinuances by Airway Communications Stations should be disregarded.

POSITION REPORTING: The safety and effectiveness of air traffic control depend to a large extent on accurate position reporting by pilots. In order to provide proper separation and expedite aircraft movements, ATC must be able to make accurate estimates of the progress of every aircraft operating on an IFR flight plan.

Unless pilots make all required position reports promptly and accurately, it is difficult for controllers to compute the actual and future positions of flights, sometimes with the result that traffic conflictions cannot be accurately forseen. An error of even one minute in position reporting can result in delays or in separation which is less than the required minimum.

In making en route position reports, pilots should ensure that their time setting is correct and that the time of passing a reporting point is given to the nearest minute. Care should also be taken that the reporting point is identified correctly.

When an aural or light-panel indication is used to determine the time of passing a reporting point such as a fan marker, "Z" marker, cone of silence, or intersection of range courses, the time should be noted when the signal is first received and again when it ceases. The mean of the two times should then be taken as the actual time over the fix. If position is given with respect to distance and direction from a reporting point, the distance and direction should be computed accurately.

In connection with position reporting, attention is directed to the fact that a change in airspeed constitutes a change in flight plan. As such, a proposed variation in true airspeed must be reported to ATC.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct C. & G.S. Rdo Facility Chart #55, dated Nov. 30, 1949 La Fayette, La., VOR frequency to read 117.7 mc., and delete 6219 kc as receiving facility.

Correct C. & G.S. Rdo Facility Chart #37, dated Jan. 18, 1950 to show Las Vegas, Nev. AFB Tower operating continuously.

Correct C. & G.S. Rdo Facility Chart #35, dated Jan. 11, 1950 to show Manakin, Va., MHW operating continuously.

✓ AMENDMENTS TO PUBLISHED MINIMUM EN ROUTE INSTRUMENT ALTITUDES: The following minimum en route instrument altitudes amend those published in Flight Information Manual Vol. 4, No 2, dated February 1, 1950:

(1) Green Civil Airway No 5, is amended to read in part:

From	To	Min. Altitude
*Casa Grande (INT), Ariz.	Tucson, Ariz. (Southeastbound)	10,000
7000' - Minimum Crossing Altitude at Casa Grande (INT), Southeastbound		
Tucson, Ariz.	Casa Grande (INT), Ariz. (Northwestbound)	7,000
.....	.....	.....
.....	.....	.....
.....	.....	.....
.....	.....	.....
.....	.....	.....
.....	.....	.....
.....	.....	.....
*Salt Flat, Tex.	Guadalupe Pass (FM), Tex.	10,000
8900' - Minimum Crossing Altitude at Salt Flat, Eastbound		
Guadalupe Pass (FM), Tex.	Orla (INT), Tex. (Eastbound)	8,000
*Orla (INT), Tex.	Guadalupe Pass (FM), Tex. (Westbound)	10,000
7000' - Minimum Crossing Altitude at Orla (INT), Westbound		
(2) Green Civil Airway No. 6, is amended to read in part:		
Maxwell, Ala.	Atlanta, Ga.	2,000
(3) Amber Civil Airway No. 2, is amended to read in part:		
*LaHabra (INT), Calif.	Daggett, Calif.	12,000
12.000' - Minimum Crossing Altitude at LaHabra (INT), Northeastbound		
(4) Amber Civil Airway No. 4, is amended to read in part:		
Tulsa, Okla.	Verdigris River (INT), Okla.	1,800
(5) Amber Civil Airway No. 7, is amended to read in part:		
Peabody (INT), Mass.	Portland, Me.	1,700
(6) Red Civil Airway No. 10, is amended to read in part:		
Campbellton, Ga.	Atlanta, Ga.	2,300
(7) Red Civil Airway No. 12, is amended to read in part:		
Joliet, Ill.	Int. E crs. Joliet, Ill. and W crs. So. Bend, Ind.	2,300
Int. E crs. Joliet, Ill. and W crs. So. Bend, Ind.	South Bend, Ind.	2,000
(8) Red Civil Airway No. 17, is amended by adding:		
Chanute, Ill.	Rensselaer (INT), Ill.	1,900
(9) Red Civil Airway No. 21, is amended to read in part:		
Salem (INT), Conn.	Providence, R.I.	1,700
(10) Red Civil Airway No. 37, is amended to eliminate:		
Summit (INT), Va.	Quantico, Va.	1,500
Quantico, Va.	McLean (INT), Va.	1,800
(11) Red Civil Airway No. 45, is amended by adding:		
Summit (INT), Va.	Quantico, Va.	1,500
Quantico, Va.	McLean (INT), Va.	1,800
(12) Blue Civil Airway No. 11, is amended to read in part:		
South Bass (INT), Ohio	Mid-Lake (INT), Ohio	1,800

(2-28-50)

(13) Blue Civil Airway No. 24, is amended to read in part:

From	To	Min. Altitude
*Palm Springs (INT), Calif.	*Daggett, Calif.	13,000

12,000' - Minimum Crossing Altitude at Palm Springs (INT), Northbound

10,000' - Minimum Crossing Altitude at Daggett, Southbound

(14) Blue Civil Airway No. 34, is amended by adding:

Int. N crs. Terre Haute, Ind. and SE crs. Chanute, Ill.	Chanute, Ill.	1,900
Chanute, Ill.	Int. NW crs. Chanute, Ill. and SW crs. Joliet, Ill.	1,900

(15) Blue Civil Airway No. 44, is amended to read in part:

Indianapolis, Ind.	Kokomo MH, Ind.	2,100
Kokomo MH, Ind.	Fort Wayne, Ind.	2,000

(16) Blue Civil Airway No. 66, is amended to read in part:

Int. SE crs. Bridgeport, Conn. and E crs. LaGuardia, N.Y.	Bridgeport, Conn.	1,200
Bridgeport, Conn.	Poughkeepsie, N. Y.	2,400

(17) Direct Routes - Northeast United States is amended in part:

Charleston, W. Va.	Columbus, Ohio	2,200
Kokomo, Ind.	Lafayette, Ind.	2,200
Kokomo, Ind.	Chicago, Ill.	2,200

(18) Direct Routes - Southwest United States is amended by adding:

Little Rock, Ark.	Int. N crs. Stuttgart, Ark. and a direct course between Little Rock and Walnut Ridge, Ark.	1,600
Int. N crs. Stuttgart, Ark. and a direct crs between Little Rock and Walnut Ridge, Ark.	Walnut Ridge, Ark.	1,700

ON-REQUEST REPORTING POINT: Effective immediately the following On-Request Reporting Point is established:

Seneca 14 Intersection - Intersn of the SW course of Spartanburg, S. C. and the E course of Greenville, S. C.

DETERMINATION OF BEARING AND DISTANCE FROM RADIO RANGE STATION TO AIRPORT: The bearing and distance hereafter to be shown in Department of Commerce publications (Instrument Approach and Landing Charts, Radio Facility Charts, and the Airman's Guide) is that from the range station to the nearest end of the instrument runway, or, in the case of an airport having no instrument or other runways, to the nearest point of the usable landing area.

INSTRUMENT APPROACH PROCEDURES: Smoky Hill (Salina), Kans., Smoky Hill AFB - DISREGARD notice carried in Vol. 4, No. 24, concerning the cancellation of the low and very high frequency range procedures at this location.

DANGER AREA DESIGNATIONS: The following Danger Area amendment will be effective on March 15, 1950, unless otherwise advised.

AMENDMENT NO. 27

(1) Vernalis, California, areas are added to read: Location: Vernalis (San Francisco Chart). Description: North Area: Beginning at lat. 37-37-00N, long. 121-12-00W; SSE to lat. 37-20-35N, long. 121-05-40W; NW to lat 37-31-10N, long. 121-30-45W; NNW to lat. 37-37-00-N, long. 121-33-00W; due E to lat. 37-37-00N, long. 121-12-00W, point of beginning. Altitudes: 1500' to 60,000'. Time: Daily, during daylight hours. Using Agency: 12th Naval District, and Ames Aeronautical Laboratory, San Francisco, Calif.
Description: South Area: Beginning at lat. 37-20-35N, long. 121-05-40W; SSE to lat 37-06-00N, long. 121-00-00W; WNW to lat. 37-12-00N, long. 121-25-00W; NNW to lat. 37-31-10N, long. 121-30-45W; SE to lat 37-20-35N, long. 121-05-40W, point of beginning. Altitudes: 15,000' to 60,000'. Time: Daily during daylight hours. Using Agency: 12th Naval District, and Ames Aeronautical Laboratory, San Francisco, Calif.

(2) The Patuxent, Maryland, area (a) is amended by changing the "Description by Geographical Coordinates" column to read: "(a) Beginning at the town of Federalsburg, Md., (lat. 38-41-40N, long. 75-46-00W); southerly to the town of Sharptown, Md. (lat. 38-32-30N, long. 75-43-15W); SSE to the town of Fruitland, Md. (lat. 38-19-00N, long. 75-37-00W); southerly along the railroad to the town of Princess Anne, Md. (lat 38-12-30N, long. 75-41-30W); southwesterly to lat. 38-02-30N, long. 75-52-30W; due S to lat. 37-55-00N (western boundary of Amber Airway No. 9) SW to lat. 37-46-35N, long. 75-59-35W; SSW to lat 37-45-00N, long. 76-00-05W; due W to long. 76-30-10W; NNW to lat. 38-05-10N, long. 76-34-15W; NE to lat. 38-11-10N, long. 76-25-10W; NE to lat. 38-30-00N, long. 76-04-00W; NE to the town of East New Market, Md. (lat. 38-36-00N, long. 75-55-30W); NE following the railroad to the town of Federalsburg, Md. (lat. 38-41-40N, long. 75-46-00W), point of beginning.

(3) The Monomoy (misspelled "Monomy") Point, Massachusetts, area is deleted.

(4) The Wellfleet, Massachusetts, area is amended by changing the "Name and location (chart)" column to read: "South Wellfleet (Boston Chart)", and by changing the "Time of Designation" column to read: "Continuous".

(5) The Underhill, Vermont, area is amended by changing the "Using Agency" column to read: "Adjutant General, State of Vermont, Montpelier, Vermont."

POST DEADLINE DATA:

Correct Flight Information Manual Vol. 4, No. 2, dated Feb. 1, 1950, Page 166, Minimum En route Instrument Altitudes, (1) Blue 88: Change Tanacross (INT) Alaska to Carcross (INT), Y.T.(2)Green 4: Change Minimum Enroute Instrument Altitude between the intersection of the E course of Amarillo and the SW course of Gage and Gage from 4700' to 4500'

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary conditions cannot be given immediate coverage in the "Airman's Guide", but Teletype Notam service gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Old Post Office Bldg., Montgomery, Ala.

ANNISTON ARPT: Ctn, strip extensions in progress. Equip on fld. (12-14)

BIRMINGHAM ARPT: 2-way rdo rqrd hgts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15)

CRAIG AFB (SELMA): Ext inst trng on Craig rng 0800-1700 during IFR conditions. (2-6)

FT. MORGAN AIRFLD: Ctn, grading. (1-13)

JASPER-WALKER CO. ARPT: NW/SE Strip under const. (1-30)

LANETT-VALLEY ARPT: E/W Strip clsd, freshly graded, soft. (12-7)

★MAXWELL AFB (MONTGOMERY)-RADIO: Feb 25, NE crs realigned to 180°. Rng is unreliable, pending flgt-check. (2-25) These data rcvd too late for inclusion on ANRA page.

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17)

MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern sector within 20° E and W mag. north where severe course indicator roughness is present. (1-20)

(2-28-50)

[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 707-½ West Thomas Road, Phoenix, Arizona.
DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (12-29)
**FLAGSTAFF: The following described area, 9 mi W, has been approved as Demolition Area from use by the Navajo Ordnance Depot: N bndry: Santa Fe RR; E bndry: long. 111-48-30; S bndry: lat 35-09-40; W bndry: long. 111-55-00. Adequate notices to airmen will be issued in advance of demolition activities.
GILA BEND AF AUX: All obsts except 208' twr 1/2 mi S of fld not lgtd. (12-8)
GOODYEAR AF AUX: Student trng during daylgt hrs only. (1-26)
PHOENIX: Exten trng on Phoenix Rng on all courses except W. (11-2)
PHOENIX-SKY HARBOR ARPT-TOWER: Effect Dec 15, 1949, CAA ILS was shut down until approx March 25, 1950. (2-16) FLD: Rnwys 8L-26R and 17-35 clsd. 2-way rdo rqrd on Rnwys 8R-26L and 3-21. Rdo rcvr rqrd on all other lndg areas. Area between Rnwy 8L-26R, N taxi strips and between Rnwy 17-35 W to crossover clsd, mrkd. NW end Rnwy 12-30 shortened to 4000'; NE end Rnwy 3-21 shortened to 500', mrkd. Nordo crop dusters rstd to use of dirt mat area. (2-16)
[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Adams Field, P. O. Box 1397, Little Rock, Ark.
BLYTHEVILLE-RADIO: About March 15, LF range and stn lctn mrkr will be permanently discontinued. (2-20)
EL DORADO-GOODWIN ARPT: N/S Rnwy lgts inop. (1-30)
FORT SMITH-RADIO: VHF omnirng on 113.1 mc unreliable. (10-15)
FORT SMITH ARPT: Asphalt portion W end E/W Rnwy unsafe for acft of twin-eng size or larger. (2-23)
**NEWPORT ARPT: 232' obst lgtd twr Rdo Stn KNBY erected 4.5 mi SW (241° T) at lat 35-36-38, long. 91-15-02. (1-11)
TEXARKANA-RADIO: VHF omnirng radials 8 mi out from stn, course roughness and mild bends. (11-16) About Feb 27, stn lctn mrkr will be shut down until approx Mar 3 - modification. (1-9)
WALNUT RIDGE-RADIO: LF rng courses aligned by gnd-check only. (11-3) VHF omnirng operg on 115.7 mc normally from gnd observation only. Ctn advised until flgt-checked. (12-20)
[redacted]: SPECIAL NOTICE: The addresses of the CAA District Airport Engineers are: (So. of Fresno) 5651 W. Manchester Ave., Los Angeles 45, Calif.; (Fresno & North) 206 Appraisers Bldg., 630 Sansome St., San Francisco 11, Calif.
ALAMEDA NAS: Maint high apch on Rnwys 26L and 21, hvy acft parked these areas. (2-15)
ALTURAS MUN ARPT: All rnwys clsd, snow. (1-17)
ALTURAS MUN #1 ARPT: Use at own risk, drifting snow. (1-17)
BLUE CANYON INT FLD: Clsd (snow). (1-3)
BRAWLEY ARPT: NW/SE Strip and tie down area N of hangar under const. Use rnwy mrkd by white discs and bndry lgts. (12-30) NE/SW, E/W Strips clsd. (1-13)
★BURBANK-LOCKHEED AIR TERMINAL-TOWER: CAA ILS OMK on 359 kc discont. Lclzr and OM oper on test basis only. Lclzr freq: 109.5 mc, channel X, lctd 150' W of W end E/W Rnwy. Ident: "BUR" (2-22) FLD: Clsd to all trans P-80 acft except on special projects for modification. (11-15)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft shall oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CAMBRIA-PINES ARPT: Soft when wet. (2-11)
CAMP PENDLETON OLF (OCEANSIDE): Trans acft clear thru MCAS El Toro. (10-5)
★CASTLE AFB (MERCED)-RADIO: USAF X-band radar bcn (AN/CPN-6) has been moved to new lctn: lat 37-20-22, long. 120-34-00. (2-11)
CASTLE AFB (MERCED): Use only Rnwy 12-30, acft parked on lndg mat. (12-22)
**CHICO ARPT: 240' temp obst lgtd twr Rdo Stn KHSL erected 5.5 mi SE (132° T) at lat 39-44-00, long. 121-47-10. (1-22)
COSO JUNCTION ARPT: E/W Strip under const. (1-13)
DOS PALOS-EAGLE ARPT: Bcn inop. (2-26)
EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C.G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 miles out during daylgt hrs for permission to cont to fld. (8-31)

CALIFORNIA: EL CENTRO-RADIO: LF rng flgt-checked Feb 15, courses correctly aligned.
EL CENTRO NAAS: All rnwy lgts inop. Rnwy lgts 3-21 avail on req. Const on rnwys. (12-20)
**EL CENTRO-ESHELMAN'S ARPT: New fld. Lat 32-45-45, long. 115-33-15. (1-11)
EUREKA-HUMBOLDT CO. ARPT: Equip on fld intermittently day, ngt. Ditch on W side NW/SE Taxiway filled but extremely soft. 6' unlgtd jet FIDO unit 800' from SE end Rnwy 31, 200' E rnwy centerline. Use rnwys, taxiways only. (1-10)
FAIRFIELD-SUISUN AFB-RADIO: USAF rng operg normally; multiples and splits beyond 25 mi radius. (12-1)

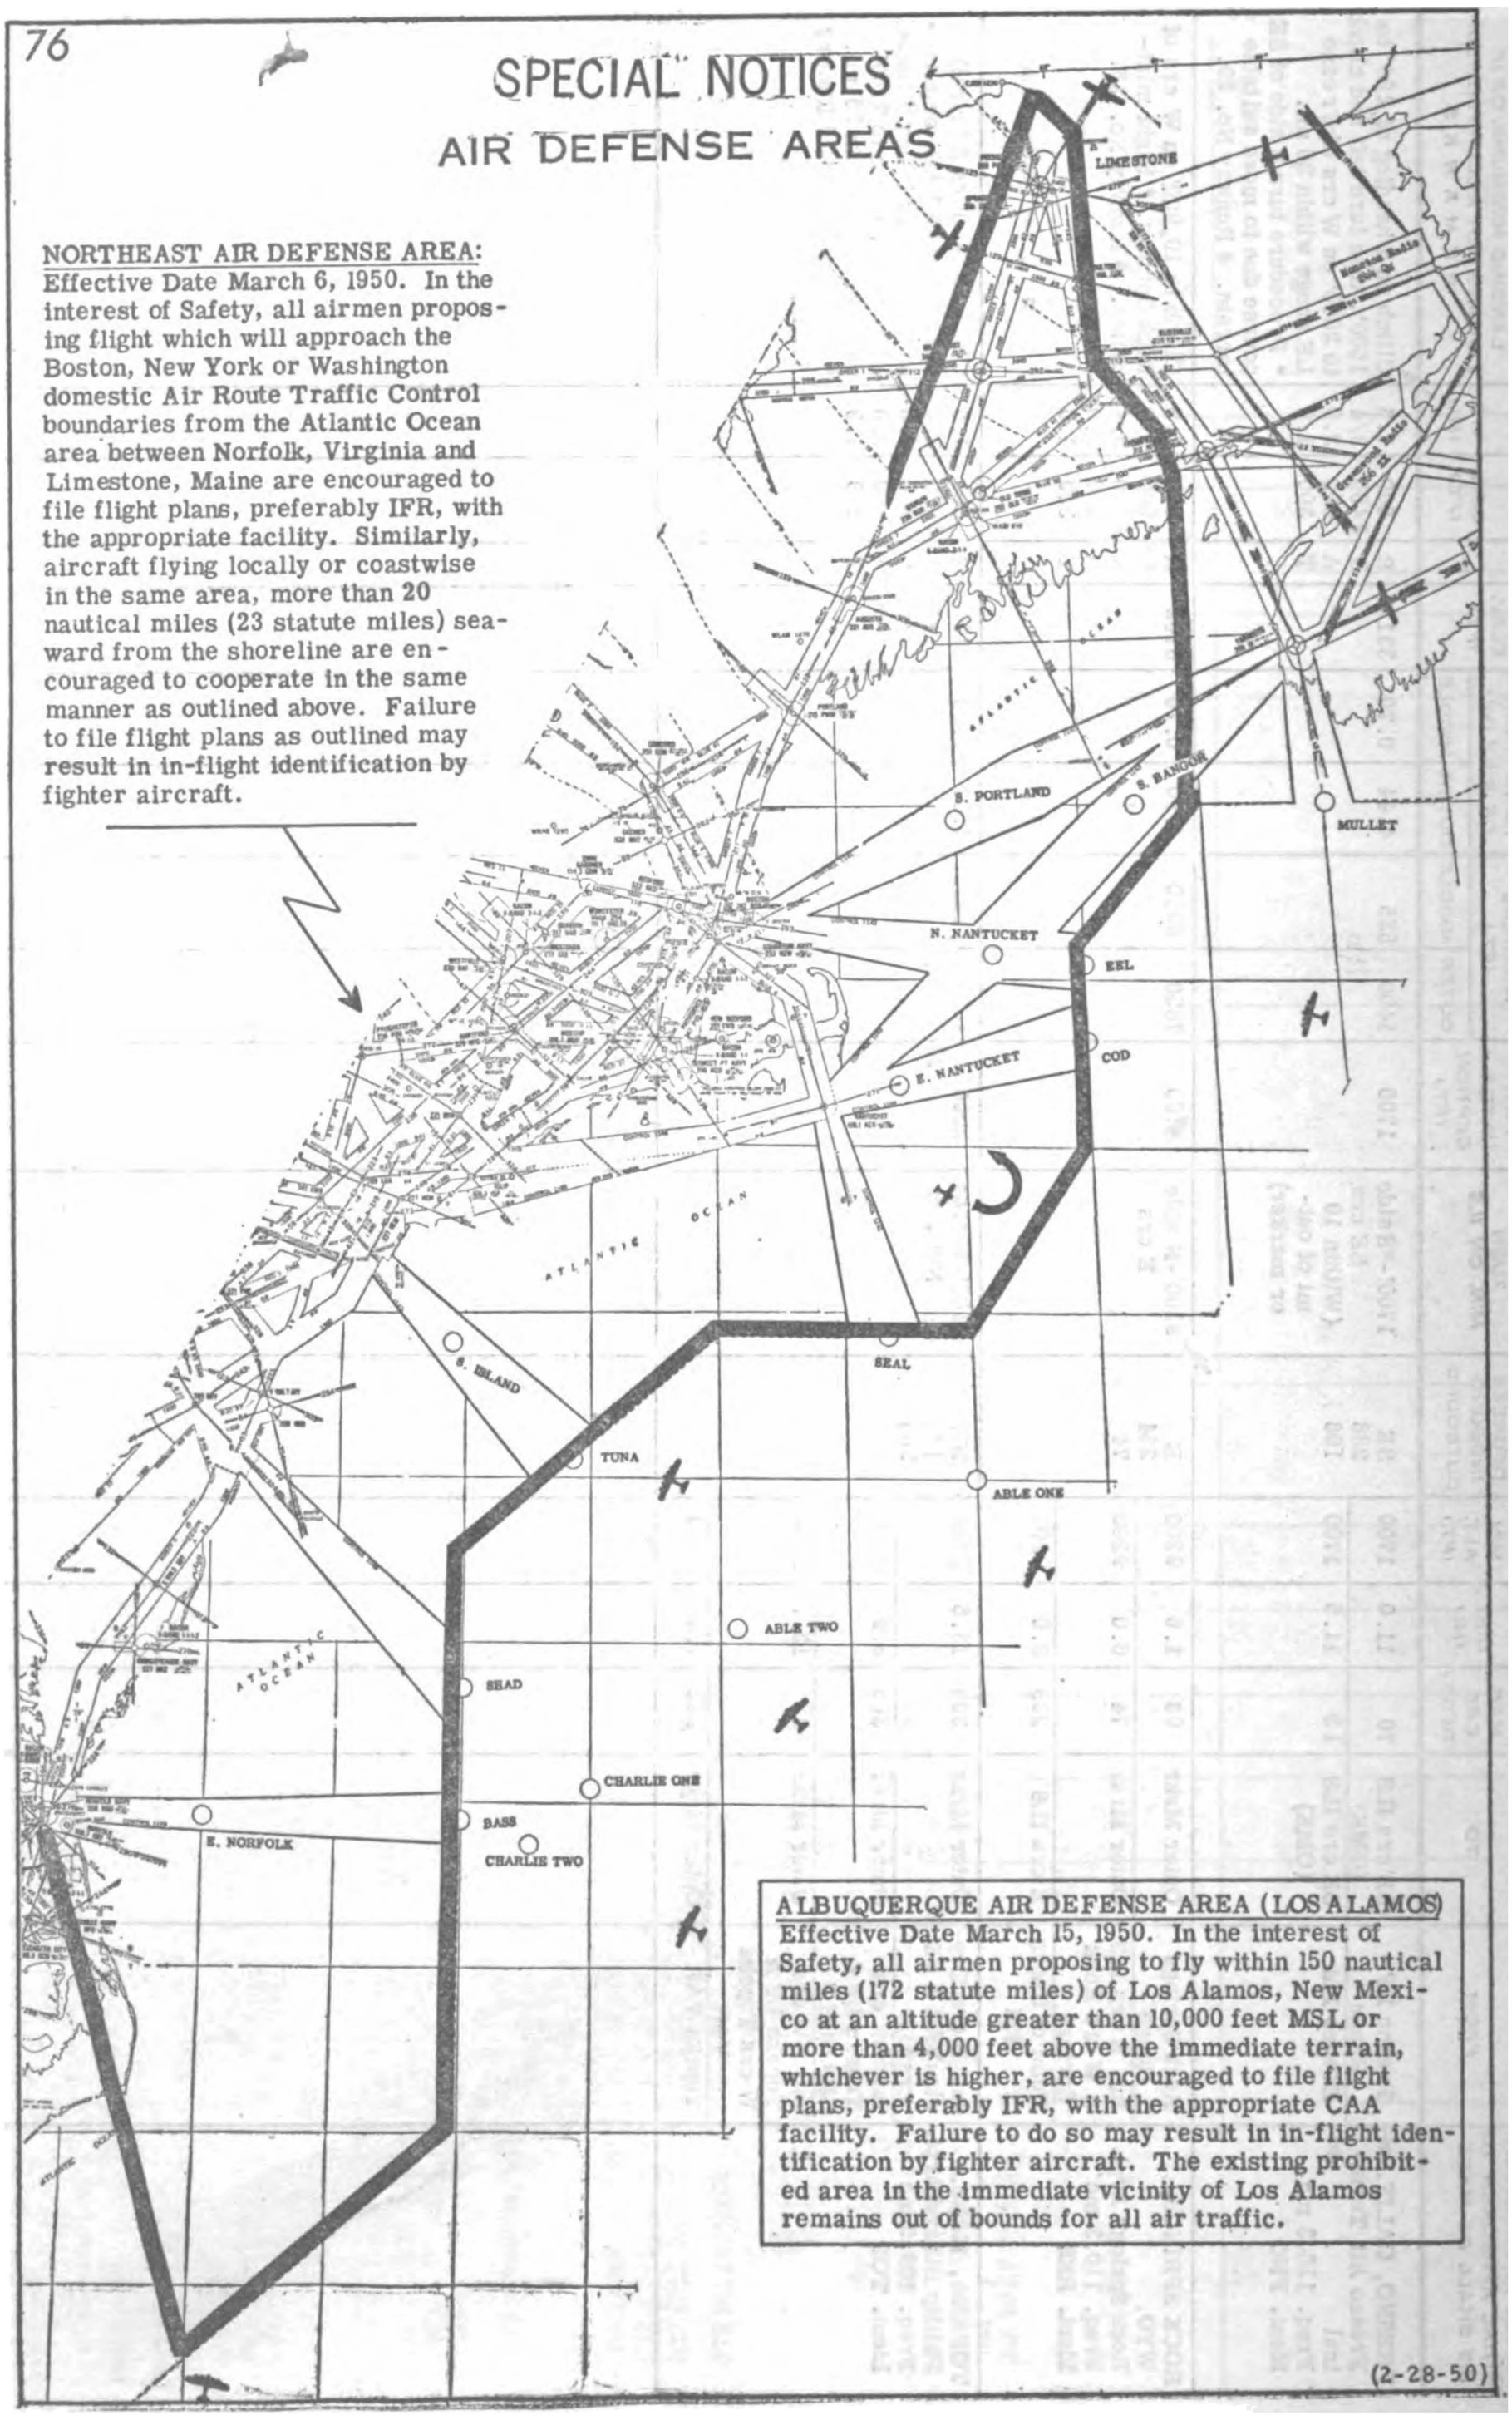
SPECIAL NOTICES

AIR DEFENSE AREAS

NORTHEAST AIR DEFENSE AREA: Effective Date March 6, 1950. In the interest of Safety, all airmen proposing flight which will approach the Boston, New York or Washington domestic Air Route Traffic Control boundaries from the Atlantic Ocean area between Norfolk, Virginia and Limestone, Maine are encouraged to file flight plans, preferably IFR, with the appropriate facility. Similarly, aircraft flying locally or coastwise in the same area, more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.



ALBUQUERQUE AIR DEFENSE AREA (LOS ALAMOS) Effective Date March 15, 1950. In the interest of Safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Los Alamos, New Mexico at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft. The existing prohibited area in the immediate vicinity of Los Alamos remains out of bounds for all air traffic.

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

AIRMAN'S GUIDE

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS AIR FORCE AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Air Force towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A) = Air Force Facility. G.P. = Glide Path. L7=Hi-intensity approach lgts. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation. MMK's. < OMK's are at the same locations as the middle and outer markers unless otherwise specified. → New or revised data. + =additional data will be found in Notices To Airmen section

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: Only those courses cited in Notam section have been flight-checked and found usable for 50 miles unless otherwise cited. Other radials not approved for instrument use.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
➔ = New or revised data
✓ = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM . . . .VHF boundary marker
L. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
MMK. . .Compass locator station when combined with middle marker of ILS
MOR. . .Low frequency omni-directional range
MRA. . .Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . .Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
OMK. . .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Visual omni-directional VHF range
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495,3117.5 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-3117.5,122.1 = guards every frequency in group (3) except 3117.5 and 122.1
(3),6210-3117.5 = guards 6210 plus every frequency in group (3) except 3117.5

NOTES

1. The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. All CAA Control towers stand continuous watch on 3117.5 kc, airline frequency. CAA INSACS, however, will discontinue watch on 3117.5 kc sometime after April 1, 1950. INSAC with associated tower does not guard 3117.5 kc except when tower inoperative.
3. Range courses are magnetic in-bearings.
4. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
5. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
6. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(A) AIRPORT NAME (WITH **A IN TYPE COLUMN**) - **FIELD OWNED OR LEASED IN WHOLE BY U. S. AIR FORCE. AS SUCH, FIELD IS OPEN TO CIVIL ACFT ONLY BY PRIOR PERMISSION OF C. O. THEREOF.**

NOTE: SIMILAR COMBINATIONS OF N, CG, AND **NG INDICATE THE SAME IS APPLICABLE FOR NAVY, COAST GUARD, AND NATIONAL GUARD FIELDS, RESPECTIVELY.**

(A) City and Airport Name **(with C,I,M,MG, or P in Type column)** - a civil airport **with Air Force operations, reserve** training, or other **such activity thereon.**

(P) City and Airport Name - **Civil Airport covered by an agreement** between municipality **and Air Force which permits** use by transient military **aircraft.**

★ City and Airport Name - **C.A.A. Int.** Field, **open to mil** acft. "★Effingham, 10, **STL-IND,"** for **example,** indicates that the airport **is Effingham C.A.A. Intermediate** Field, Site 10 on **the St. Louis-Indianapolis Airway.** Municipal airports **where the lights are maintained** by the C.A.A. **are listed similarly except that there is no** prefixed **star.**

NOTES:

1. **Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.**
2. **Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or ★**
3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.
4. **When city and airport names are identical, the airport name is omitted in the interest of space-conservation.**

TYPE

A	**-U.S. Air Force**	**I**	**-Intermediate**	**N**	**-Navy**
C	**-Commercial**	**M**	**-Municipal**	**NG**	**-Nat'l Guard**
CG	**-Coast Guard**	**MG**	**-Misc. Govt.**	**P**	**-Private**

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.

NOTE: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting

- **L** - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- **1** - Strip lights or portable runway lights (Electrical)
- **2** - Boundary
- **3** - Runway floods
- **4** - Runway
- **5** - Instrument approach
- **6** - High intensity runway
- **7** - High intensity instrument approach

✱ **An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).**

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
- F1: 80 oct., at least
- F2: 87 oct., and lower
- F3: 91 oct., and lower
- F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Army and Navy Fuel:
- A+: 115/145 oct.
- A : 100/130 oct.
- B : 91/98 oct.
- C : 73/80 oct.
- J : JP-1

REMARKS

(a) **"CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.**

(b) **"INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the aircraft is assigned.**

(c) **"CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.**

(d) **"STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the Liquidation Service of General Services Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.**

(e) **"ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.**

(f) **"FEE" indicates landing charges for private or non-revenue producing aircraft. Very few airports charge landing fee for private aircraft. A number of fields, however, have parking fees for planes that remain over a couple of hours and which buy no services. Most of the major airports such as airline terminals have landing fees for all revenue producing aircraft. Unfortunately, we cannot indicate these in the guide.**

(g) **"+" indicates additional data will be found in Notices to Airmen Section.**

(h) **"Blkd" indicates approaches where glide angle to runway is 3:1 or less.**

(i) **"Rgt tfc N" indicates right turns should be made on landings and take-offs to the N.**

NOTES

1. **→ New or revised data.**
2. **SCHEDULED AIRLINE STOP airport names are capitalized.**
3. **PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.**
4. **OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example,** clearly **discernible for** contact operations, **are** frequently omitted. On the other hand, all pole lines within at least a 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NEW AIRPORTS (or airports out of alphabetical alignment)							
AIRPORTS ON WHICH CAA RECORDS ARE NOT YET AVAILABLE							

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

✓ AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif., or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF Alternate Control Towers
D...121.5			Two-way International Emergency Frequency
	Guard D...140.58	Guard D...140.58	CAA Airways (Range Station)

	8...134.64	8...134.1	GCA
	9...126.18	9...126.18	Control Towers
U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for a specific base. This advisory is intended for the sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 milesandceiling not less than 500'.

b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'.

c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

✓ CORRECTIONS AND AMENDMENTS TO AN 08-15-1: AND FOREIGN RADIO FACILITY CHARTS: Correct the following call signs at Military Airways Stations carried in Airman's Guide Vol. 4, No. 25: (1) Barksdale AFB, La., to read AFF13.

(2) Memphis, Tenn. (Mun Arpt), to read AFE12.

(3) Minneapolis-St. Paul International, Minn., to read AFG14.

(4) Walla Walla, Wash., to read AFH13.

✓ CHANGES FOR TO 08-15-3: (1) Concord, N.H.: -Bearing, stn to fld. 323°.

(2) Williams, Calif.: -Bearing and distance, stn to fld: 241°, 2.3 mi.

(3) Tucson, Ariz.: -Bearing and distance, stn to fld: 308°, 3.1 mi.

(4) Cheyenne, Wyo.: -Bearing, stn to fld: 67°.

(5) Alexandria, Minn.: -Bearing and distance, stn to fld: 172°, 1.9 mi.

(6) Terre Haute, Ind.: -Bearing, stn to fld: 72°.

(7) Sand Diego, Calif.: -Bearing and distance, stn to Lindbergh Field: 155°, 2.2 mi.

(8) Akron, Ohio: -Minimum Ceiling over airport: *700'. Remarks: *Minimums for acft with stall speeds less than 75 mph, 600'.

(9) Battle Creek, Mich. (Kellogg Field): -Change Initial Approach Altitude to East - 2300' (Int SE leg LAN). Complete procedure turn within 10,15, 20 and 25 mi -2000'. Missed Approach Procedure: Climb to 2200' on N leg. Remarks: Minimums for acft with stall speeds 75 mph or less - 500', 1 mi.

(10) Bolling AFB, D.C.: -Change missed approach procedure to the following: Climb to 1800' on NW leg or (when directed by ATC) climb to 1600' on NE leg.

(11) Cleveland, Ohio: -Under Minimum Altitude authorized after passing marker or intsxn, delete alt from SE and add: NW - 1900 Avon Lake FM.

(12) Detroit, Mich. (Wayne-Major): - Complete procedure turn within 10 mi at 1900', within 15,20, or 25 at 2000'. Missed approach procedure: Climb to 2300' on E leg, proceeding out right side of course.

(13) Fargo, N.D. (Procedure #1): - Change initial approach altitude from E to 3100' (Duluth Range Stn).

(14) Fargo, N.D. (Procedure #2): - Change initial approach altitude from E to 3100' (Duluth Range Stn).

(15) Grand Forks, N.D.: -Ceiling over field: 500'. Minimum altitude: 1336'. Change initial approach altitude from S to Minimum En route Altitude.

(16) Joliet, Ill.: -Change initial approach altitude from E to 2300' (Int S leg Chicago).

(17) Lafayette, Ind. (Purdue Univ. Fld.): -Change initial approach altitudes as follows: NE -2000' (Int S leg GSH). SW - 1800' (Int N leg Terre Haute). Missed approach procedure: Climb to 2000' on NE leg.

(18) Lucin, Utah: -Instrument Approach procedure has been cancelled.

(19) Newark, N.J.: -Change initial approach from NE to 2000' (Int NW leg LGA). Missed approach procedure: Climb to 1000' on NE leg, make left turn climbing to 3000' on heading 290° mag before proceeding out W leg or (when directed by ATC) climb to 1000' on NE leg and turn left and proceed to Patterson climbing to 2000'.

(20) Barksdale AFB, La.: - Delete runways 14L-32R, 14R-32L, 7-25. These perm clsd.

(21) Glenview NAS, Ill.: -Change initial approach altitude to NW -2000' (Int E leg Rockford). Delete Min Alt authorized after passing marker or Int from SW.

(22) Great Falls AFB, Mont.: -Page 70, delete MHW fac operating on 341 kc. (This fac discontinued).

(23) Key West NAS, Fla.: -Change initial approach altitude to E - 1400' (Int SW leg Homestead).

(24) Buffalo, N.Y.: - Page 25, show NE quadrant bi-sector heading 251°.

(25) Utica, N.Y.(Griffiss AFB).: - Change initial approach altitudes to the following: NE - Minimum En route Altitude; SE - Minimum En route Altitude; SW - 4000' (S leg Syracuse); NW -3000'(N leg Syracuse). Low Cone: 2500'. Bearing and distance stn to fld: 315°, 2.9 mi. Missed approach procedure : Climb to 3000' on NW leg within 25 mi. Remarks Obstruction 1677', 4 mi E side approach leg (formerly marked 1280')

(26) Maxwell AFB, Ala.: -Page 98, NE leg radio rng has been realigned to 180° mag.

(27) Smyrna AFB, Tenn.: - Change listing to Sewart AFB. (Smyrna).

(28) Las Vegas AFB, Nev.: - Change listing to Nellis AFB. (Las Vegas).

✓ CHANGES FOR PILOTS HANDBOOK, JET SPECIAL US: Turner AFB, GA. - Jet letdown procedure published in Pilots Handbook will not be used until revised procedure is approved and published.

✓ CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B-2, Movement and Control Messages, July 1, 1948; II-B-3, Notices to Airmen, First Edition May 1, 1949 with one revision; Contractions, Fourth Edition, Dec 1, 1949; Location Identifiers, Third Edition, Sept 15, 1948, with 17 supplements.

GROUP II MATERIAL: II-B-5, Airways Air-Ground Communications, Second Edition, Sept 1, 1948, with two revisions.

GROUP III MATERIAL: II-B-7, Landline Operating Procedures, April 15, 1945.

GROUP IV MATERIAL: Civil Airways Mileage Chart of July 27, 1949.

GROUP V MATERIAL: Service "A" Manual, Feb. 21, 1950 with four revisions; Service "C" Manual Jan 24, 1950; Teletype Maps: M-10, Jan 1, 1949; M-11, Dec. 1, 1949; M-13, June 15, 1948; and M-14, July 1, 1948.

GROUP VI MATERIAL: Teletype Maps: Drawing M-58, April 1, 1949; Drawing M-59, Jan 5, 1949.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting

the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine air-ground communications installations are being discontinued.

CIVIL SPECIAL NOTICES

ON-REQUEST REPORTING POINT: Established. Riverdale, Tenn: Intsxn of the back crs of the Knoxville, Tenn., ILS localizer and NE crs of Knoxville, Tenn., LF/Rng.

DESIGNATION AND REDESIGNATION OF CIVIL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES, AND REPORTING POINTS: Effective 0001 EST April 4, 1950, Civil Airways, Control Areas, Control Area Extensions, Control Zones, and Reporting Points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red Airway No. 4 (Otto, N.M., to Las Vegas, N.M). From the intsxn of the S crs of the Otto, N. M., rdo rng with a direct line between the Albuquerque, N.M., rng stn and the Roswell, N.M., rdo rng stn via the Otto, N.M., rdo rng stn . . .

(2) Red Airway No. 11 (Ardmore, Okla., to Boston, Mass.). From the intsxn of the NE crs of the non-directional rdo bcn to the Tulsa, Okla., rdo rng stn. From the intsxn of the NE crs of the Tulsa, Okla., rdo rng and the S crs of the Chanute, Kans., rdo rng via the Springfield, Mo., rdo rng stn . . .

(3) Red Airway No. 17 (St. Louis, Mo., to Baltimore, Md.). From the intsxn of the S crs of the St. Louis, Mo., rdo rng and the SW crs of the Scott (Belleville), Ill., AFB rdo rng via the Scott (Belleville), Ill., AFB rdo rng stn to the intsxn of the NE crs of the Scott (Belleville), Ill., AFB rdo rng and the W crs of the Effingham, Ill., rdo rng. From Rantoul (Chanute), Ill., AFB rdo rng. . .

(4) Red Airway No. 19 (Grand Rapids, Mich., to Norfolk, Va.). . . the intsxn of SE crs Morgantown, W.Va., and W crs Front Royal, Va., rdo rng. From the intsxn of the SW crs of the Arcola, Va., rdo rng and the W crs of the Quantico, Va. (Navy) rdo rng to the Quantico, Va., (Navy) rdo rng stn excluding the portion more than one mile N of the W crs of the Quantico, Va., (Navy) rdo rng. From the intsxn of the N crs of Richmond and NW Tappahannock, Va., rdo rng. . .

(5) Red Airway No. 71 (El Paso, Tex., to Wichita Falls, Tex.). From the intsxn of the E crs of the El Paso, Tex., rdo rng and the SW crs of the Roswell, N.M., rdo rng via the Roswell, N.M., rdo rng stn; the intsxn of the NE crs of the Roswell, N.M., rdo rng and the W crs of the Lubbock, Tex., rdo rng; Lubbock, Tex., rdo rng stn. . .

(6) Red Airway No. 88 is added to read: (Albuquerque, N.M., to Roswell, N.M.). From the Albuquerque N.M., rdo rng stn via the Roswell, N.M., rdo rng stn to the intsxn of the SE crs of the Roswell, N.M., rdo rng and a point 25 miles SE of the Roswell, N.M., rdo rng stn.

(7) Blue Airway No. 3 (Tallahassee, Fla., to Lafayette, Ind.). . . Maxwell Field, Ala., AFB rdo rng stn to the intsxn of the N crs of the Maxwell Field, Ala., AFB rdo rng and the E crs of the Birmingham, Ala., rdo rng. From the Muscle Shoals, Ala., rdo rng. . .

(8) Blue Airway No. 6 (Abilene, Tex., to Muskegon, Mich.). . . the intsxn of NE crs of Whicita, Falls, Tex., and the S crs of Oklahoma City, Okla. From the intsxn of the SE crs of the Scott, (Belleville), Ill., AFB rdo rng and a point 25 mi SE of the Scott (Belleville), Ill., AFB rdo rng stn via the Scott, (Belleville), Ill., AFB rdo rng stn to the intsxn of the NW crs of the Scott, (Belleville), Ill., AFB rdo rng and the SW crs of the Springfield, Ill., rdo rng. From the Springfield, Ill., rdo rng stn. . .

(9) Blue Airway No. 30 (Brownsville, Tex., to Amarillo, Tex.). . .the intsxn of the NW crs of the Big Spring, Tex., rdo rng and the S crs of the Lubbock, Tex., rdo rng. From the Lubbock, Tex., rdo rng stn. . .

CONROL AREAS:

(1) Red Airway No. 11 Control Area (Ardmore, Okla., to Boston, Mass.). CAPTION CHANGE.

(2) Red Airway No. 17 Control Area (St. Louis, Mo., to Baltimore, Md.). CAPTION CHANGE.

(3) Red Airway No. 71 Contol Area (El Paso, Tex., to Wichita Falls, Tex.) CAPTION CHANGE.

(4) Red Airway No. 88 Control Area (Albuquerque, N.M., to Roswell, N.M.). All of Red Airway No. 88.

CONTROL AREA EXTENSIONS:

(1) Westfield, Mass., control area extension is revoked.

(2) Montgomery, Ala., control area extension.From the Maxwell AFB rdo rng stn, Montgomery, Ala., extending 5 mi either side of the W crs of the Maxwell AFB rdo rng to a point 25 mi W of the rdo rng stn.

(3) Norfolk, Va., control area extension.Within a 25 mi radius centered at lat. 36-58-00 long. 76-25-00, excluding danger areas.

(4) Fort Wayne, Ind., control area extension.From the Fort Wayne, Ind., ILS localizer extending 5 mi either side of the localizer course to a point 20 mi SE of the outer marker.

(5) Lubbock, Tex., control area extension is revoked.

CONTROL ZONES:

(1) Delete the following control zone (5 mile radius): Lafayette, La.; Mun. Arpt.

(2) Wichita, Kans., control zone.Within a 5 mi radius of the Wichita Municipal Airport extending 2 mi either side of the N crs of the Wichita rdo rng to the Kechi FM and extending within 2 mi either side of the localizer crs to a point 10 mi S of the airport.

(3) Effingham, Ill., control zone is revoked.

(4) New York, N.Y., control zone.Within a 5 mi radius of the Floyd Bennett Naval Air Station, excluding that portion which lies within the New York International (Idlewild) control zone.

(5) New York, N.Y., control zone.Within a 5 mi radius of the New York International (Idlewild) Airport extending 2 mi either side of the SW crs of the Idlewild, New York rdo rng to the Sea Bright, N.J., non-directional rdo bcn and extending 2 mi either side of the SE crs of the Floyd Bennett (Navy) rdo rng to the intersection of the SE crs of the Floyd Bennett (Navy) rdo rng and the SW crs of the Mitchel AFB rdo rng.

(6) Lafayette, La., control zone is added to read.Within a 5 mi radius of the Mun.Airport extending 5 mi either side of a track 360° mag to a point 10 mi N or the airport.

(7) Scott AFB (Belleville), Ill., control zone is added to read.Within a 5 mi radius of the Scott AFB extending 2 mi either side of the SW crs of the Scott AFB (Belleville), Ill., rdo rng to a point 10 mi SW of the rdo rng stn.

REPORTING POINTS:

(1) Amber Airway No. 1 (U.S.-Mexican Border to Nome, Alaska) . . . the intsxn of NW Sitka rng and SW Gustavus rng; Yakutat, Alaska, rdo rng stn; the intsxn of the NW crs of the Yakutat, Alaska, rdo rng and the S crs of the Yakataga, Alaska, rdo rng; the intsxn of E crs Cordova (Hinchinbrook Island) rng and the SE crs of Cordova (Mile 13) rng . . .

(2) Amber Airway No. 8 (Los Angeles, Calif., to The Dalles, Oreg.). The intsxn of the W crs of the Los Angeles, Calif., VHF rdo rng and the SE crs of the Camarillo, Calif., rdo rng; Santa Barbara, Calif., (VHF) rng; Paso Robles, Calif., (VHF) rng; Salinas, Calif., (VHF) rng; intsxn of SW San Francisco, Calif., rdo rng and NW Salinas VHF; the intsxn of the NW crs of the San Francisco, Calif., rdo rng and the SW crs of the Fairfield-Suisun, Calif., rdo rng. . .

(3) Red Airway No. 1)Portland, Oreg., to Kansas City, Mo.). . . Goodland, Kans., VHF rdo rng stn; Hill City, Kans., VHF rdo rng stn; Waldo, Kans., VHF rdo rng stn; Salina, Kans., VHF rdo rng stn; Fort Riley, Kans., (Marshall AFB) rdo rng stn; Topeka, Kans., VHF rdo rng stn.

(4) Red Airway No. 11 (Ardmore, Okla., to Boston, Mass.) CAPTION CHANGE.

(5) Red Airway No. 15 (Las Vegas, Nev., to Gila Bend, Ariz.). The intsxn of the SE crs of the Las Vegas, Nev., rdo rng and the N crs of the Needles, Calif., rdo rng.

(6) Red Airway No. 17 (St. Louis, Mo., to Baltimore, Md.). Scott AFB (Belleville), Ill., rdo rng stn; Ft. Wayne, Ind., rng. . .

(3-14-50)

(7) Red Airway No. 40 (Shemya, Alaska to Anchorage, Alaska). The intsxn of the W crs of the Kodiak, Alaska, rdo rng and the SE crs of the Naknek, Alaska, rdo rng; Kodiak, Alaska, rdo rng stn; Kenai, Alaska rng . . .

(8) Red Airway No. 71 (El Paso, Tex., to Wichita Falls, Tex.). CAPTION CHANGE.

(9) Red Airway No. 88 is added to read (Albuquerque, N.M., to Roswell, N.M.). No reporting point designation.

(10) Blue Airway No. 7 (Paso Robles, Calif., to Williams, Calif.). The intsxn of the NE crs of the Salinas, Calif., rdo rng and the SE crs of the Oakland, Calif., rdo rng.

(11) Blue Airway No. 14 (El Centro, Calif., to Sacramento, Calif.). The intsxn of the NW crs of the Riverside, Calif., rdo rng and the SE crs of the Palmdale, Calif., rdo rng.

(12) Blue Airway No. 24 (El Centro, Calif., to Daggett, Calif.). Indio, Calif., rdo rng stn; the intsxn of the NW crs of the Indio, Calif., rdo rng and the E crs of the Riverside, Calif., rdo rng.

(13) Blue Airway No. 26 (Anchorage, Alaska to Nenana, Alaska). The intsxn of N Anchorage (Merrill) localizer and SE Skwentna rng; Talkeetna, Alaska, non-directional rdo bcn; Summit, Alaska, rdo rng stn; the intsxn of the NE crs of Summit and the SE crs of Nenana.

OTHER REPORTING POINTS: Other Reporting Points is amended by adding the following reporting points:

(1) Simi Intersection: The intsxn of the SW crs of the Newhall, Calif., rdo rng and the NW crs of the Burbank, Calif., rdo rng.

(2) San Pedro Intersection: The intsxn of the SE crs of the Los Angeles, Calif., rdo rng and the SW crs of the Long Beach, Calif., rdo rng.

DANGER AREA DESIGNATIONS: The following Danger Area amendments will be effective as dated, unless otherwise advised:

AMENDMENT NO. 28 (March 21, 1950)

(1) The Chocolate Mountains, California, area is amended to read: Location: Chocolate Mountains(San Diego Chart). Description: Beginning at lat. 33-32-55N, long. 115-33-20W; SE along a road to lat. 33-25-50N, long. 115-14-30W; SW to lat 33-24-15N, long. 115-17-00W; SE and NE along a road to lat. 33-22-50N, long. 115-09-58W; SE to lat. 33-08-45N, long. 114-56-40W; SW to lat 33-01-00N, long. 115-06-00W; NW to lat. 33-28-30N, long. 115-42-30W; NE to lat. 33-32-55N, long. 115-33-20W, point of beginning. Altitudes: Surface to 40,000' Time: 0900 to 1800, daily. Using Agency: COMNAB, 11th and 12th Naval Districts, San Diego, Calif.

(2) The Vernalis, California, areas are amended by changing the "Description by Geographical Coordinates" column to read: North Area: Beginning at lat. 37-37-00N, long. 121-11-35W; SSE to lat. 37-20-35N, long. 121-06-00W; NW to lat. 37-31-10N, long. 121-31-00W; NNW to lat 37-37-00N, long.121-32-40W; due E to lat. 37-37-00N, long. 121-11-35W, point of beginning. South Area: Beginning at lat. 37-20-35N, long. 121-06-00W; SSE to lat. 37-06-00N, long. 121-00-45W; WNW to lat. 37-12-00N, long. 121-25-30W; NNW to lat. 37-31-10N, long. 121-31-00W; SE to lat. 37-20-35N, long. 121-06-00W, point of beginning.

(3) The Guadalupe Mountains, N. M., area is amended by changing the "Description by Geographical Coordinates" column to read: Beginning at lat. 32-18-00N, long. 104-52-00W; due S to lat. 32-00-00N; due W to long. 105-33-00W; due N to lat. 32-06-30N; NE to lat. 32-18-00N, long. 105-20-00W; due E to lat. 32-18-00N, long. 104-52-00W, point of beginning.

(4) An Oswego, N.Y., area is added to read: Location: Oswego (Albany Chart) Description: An arc of a circle 30,000 yds in radius centered at lat. 43-30-00N, long. 76-25-00W, between the 260° and 10° true outbound bearings. Altitudes: Surface to unlimited. Time: Daylight hours, June 1 to Sept. 30, annually. Using Agency: 1st Army, Pine Camp, New York.

AMENDMENT 29 (March 17, 1950)

(1) The San Miguel, California, area is amended to read: Location: San Miguel (San Francisco Chart). Description: Beginning at lat. 34-04-20N, long. 120-34-15W; NE to lat. 34-09-50N, long. 120-20-50W; SSE to lat. 34-05-00N, long. 120-12-30W; SSE to lat. 34-00-00N, long. 120-16-00W; due S to lat. 33-57-00N; westerly to lat. 33-55-55N, long. 120-29-40W; NNW to lat. 34-04-20N, long. 120-34-15W, point of beginning. Altitudes: Surface to 30,000'. Time: Daylight hours. Using Agency: 15th Air Force and 11th Naval District.

(2) The Moses Lake, Washington, area is amended by changing the "Description by Geographical Coordinates" column to read: Beginning at lat. 47-04-50N, long. 119-22-00W; due W to long. 119-51-20W; SW to lat. 47-02-20N, long. 119-55-00W; due S to lat. 46-49-40N; due E to long. 119-45-32W; NE to lat. 46-54-30N, long. 119-41-00W; due E to long. 119-22-00W; due N to lat 47-04-50N, long. 119-22-00W, point of beginning.

(3) A Big Delta, Alaska, area is added to read: Location: Big Delta (WAC 77, 117) Description: Beginning at lat. 63-56-00N, long. 145-40-00W; due S to lat. 63-38-00W; WNW to lat. 63-42-00N, long. 146-15-00W; due N to lat. 63-55-00N; NE to lat. 64-01-30N, long. 145-57-00W; SE to lat. 64-00-00N, long. 145-53-00W; counterclockwise along the arc of a circle with a radius of 5 miles, centered at lat. 63-59-40N, long. 145-43-30W; to lat. 63-56-00N, long. 145-40-00W, point of beginning, excluding those portions which lie within civil airways. Altitudes: Surface to 60,000'. Time: Hours of daylight, 7 days a week. Using Agency: Arctic Test Branch, Army Air Forces, Big Delta, Alaska.

EPHRATA-RADIO: VHF omnirng radials 59°, 147°, 222°, 251° flgt-checked and usable. (3-3)
**HOQUIAM-MOON ISLAND ARPT: Two 43' unlgtd antenna poles installed 440' N of NE end of Rnwy 24. (3-7)
**KENNEWICK-VISTA ARPT: 305' obst lgtd rdo twr erected 2 mi NE (42° T) at lat 46-14-36, long. 119-10-48. (2-17)

(3-14-50)

WASHINGTON: LIND ARPT: Clsd (snow). (2-6)

★McCHORD AFB (TACOMA)-RADIO: Direct pilot to weather forecaster service is avail on Channels C and D, 132.3 mc. (3-6) Mil Arwys Stn opers on 132.3, 137.88, 121.5 mc, HF voice 4765, 2862 kc; HF CW 8280 kc. Also transmits and rcvs Anchorage Air Route freqs 4220 kc. Voice 3285, 6523, 8200, 11,445 kc CW. (2-28) VHF/DF opers 0800-1700 Mon-Fri for trng only. (2-28) USAF rng is unreliable. (2-8)

METALINE FALLS-SULLIVAN ARPT: Circle fld to stop auto tfc. (1-26)

MT. VERNON OLF: Clsd to all acft except those permitted by the C. O., NAS Whidbey Island. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (2-15)

••OZETTE ROCK: The following described Danger Area has been rescinded. A Circular area with a radius of 3 mi, centered at lat 48-08-10, long. 124-43-52. NOTE: This area has never been designated by the Administrator of Civil Aeronautics.

RICHLAND-C.A.P. ARPT: Clsd (const). (1-23)

SEATTLE-RADIO: VHF omnirng shut down - relctn. (2-10)

SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. Avoid flagged area E side of strip. Equip on fld. (1-10) Equip along edges Rnwy 13-31. (2-17)

★SEATTLE NAS-RADIO: Navy VHF/DF lctd at lat 47-41-00, long. 122-15-15 opers on any freq. between 100 mc and 150 mc. Is avail on req during normal working hrs of stn. (2-22)

SEATTLE NAS: Acft in tfc are rstd from flgt over the area W of a centerline of Rnwy 14-32. Rgt hand tfc when lndg Rnwy 32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (1-16)

••SEATTLE NAS SEAPLANE BASE: Revised data. Lctn: 6.7 NNE on Lake Washington. Remarks: A+B. Bcn. Ramps, buoys, haul out. Comb oper with arpt. Emerg only or with permission of C. O. (2-17)

SEATTLE-SEATTLE-TACOMA INTERNATIONAL ARPT: VOR rng facility being erected 460' NW of glide path bldg, mrkd. Equip on fld. (1-25)

SPOKANE-RADIO: VHF omnirange radials 15°, 50°, 73°, 137°, 185°, 230° flgt-checked and usable. (3-3)

SPOKANE-FELTS FLD: Open ditch and 4' ridges of dirt extending along SW bndry within 25' of apch end Rnwy 3. Take-off and lndgs will be made on rnwy most nearly aligned with free swinging tetrahedron. When tetrahedron points 90° to rnwy take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. 1800' extension avail NE end NE/SW Rnwy. (11-8)

SPOKANE-GEIGER FLD: Equip on fld. (9-27)

TACOMA: Bridge being erected across Puget Sound Narrows approx 2 mi W of city limits. Cables and temp foot bridge will stretch across Puget Sound between high banks and supporting twrs. (1-12)

TOLEDO INT FLD: Turf lndg area clsd. Use rnwy only. (2-13)

WENATCHEE: Unmrkd p-line crosses Columbia Riv 3 mi N of Entiat and 18 mi N of Wenatchee-Fancher Fld. Wires supported on steel twrs 100' to 800' above riv surface. (2-13)

WHIDBEY ISLAND NAS(OAK HARBOR): Ctn, use center of rnwys. Covered drainage ditches on sides of both rnwys not safe for lndg or braking action. (2-15)

YAKIMA-RADIO: VHF omnirng radials 108°, 176°, 283°, 336°; altitude radials 123°, 161°, 191°, 298°, 321° flgt-checked. 176° radial usable distance 35 miles; 336° radial usable distance 40 miles. Altitude radials 123° usable distance 40 miles; 321° radial usable distance 38 miles. (3-3)

WEST VIRGINIA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Kanawha County Court House, Charleston, W. Va.

★CHARLESTON-RADIO: March 13, rcvg watch on 121.5 mc comm. These data rcvd too late for inclusion on ANRA page.

••CHARLESTON-CHARLESTON U-FLY-IT SERVICE SEAPLANE BASE: ABANDONED. (2-6)

CHARLESTON-KANAWHA CO. ARPT-TOWER: CAA ILS lclzr, MM and OM operg on test basis. Back lclzr course not usable. (3-13) FLD: Flash. hazard bcn oper sunset to sunrise lctd on ridge 4500' from NE end of Rnwy 23. Lgt elev approx 1016'. (3-2) Soon green course lgt at neon apch lgt lane will be perm discont. (2-16) Ctn, equip on fld, SE side Rnwy 5-23, and crossing Rnwy 15-33 days. Obstn mrkd, day, ngt. (3-13)

PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough. (10-21)

WEST VIRGINIA: WHEELING-OHIO-CO. ARPT: Black snow flags erected near each rnwy lgt (11-21)

WISCONSIN: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 638 State St., Madison 3, Wis.

EAU CLAIRE ARPT: Obst lgtd 504' rdo twr being erected 11 mi NW (306° T) at lat 44-57-39, long. 91-40-05. (1-26)

GRANTSBURG-RADIO: Temporarily scheduled bdcasts made on the hr and 30 min past the hr. Teletype service will be inaugurated at a later date. (1-26)

MADISON ARPT: Floodlgts Rnwy 13, 22, 31 inop. Numerous cable trenches along all rnwys and extreme ends of Rnwys 4-22 and 13-31. Equip on fld days. Sod unsafe. Due to non-visibility from twr, twr unable to ctl tfc on SE ramp. (12-21)

MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 9-27 perm clsd. (1-12)

••SUPERIOR-CRONSTROM'S SEAPLANE BASE: Lctn: 14 mi S on Lake Amnicon. Lat 46-28-30, long. 92-03-00. Lndg lane 6500' long. Fuel: F1. (1-10)

WAUTOMA ARPT: Apch clearing not completed. (1-20)

WYOMING: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Stapleton Airfield, Denver 7, Colo.

AFTON ARPT: Deep irrigation ditch runs entire W side of strip. Strip varies in width from 70 to 100'. Extreme ctn. (11-9)

BIG PINEY ARPT: Clsd to wheeled acft. E/W Strip open to ski-equipped acft. (1-26)

BURNS, BCN SITE 43, SLC-OMA: About March 30, rot. bcn will be perm discont. (3-8)

CASPER-RADIO: Soon all voice transmissions and rcvg watches will be inop for relctn of INSAC equip from Wardwell Fld to the New Natrona County Arpt. During this period the VOR and LF rng will not be monitored. (2-10)

COKEVILLE ARPT: Open to ski-equipped acft only. (1-3)

FT. BRIDGER INT FLD: Use mrkd harrowed strip (300 x 4500') running E and W parallel NE bndry. Rest of fld covered with snow and ice. (12-24)

GILLETTE ARPT: Ctn - const. Survey stakes W portion of fld. (3-6)

KEMMERER ARPT: Clsd (snow). (3-9)

LARAMIE-RADIO: LF rng course monitor device decomm. (10-18)

PINE BLUFFS ARPT, SITE 44, SLC-OMA: Clsd ngts, high vegetation. Use strips between green apch lgts on E/W and N/S apchs days only. Red flash. hazard lgts and red flags displayed on twr. About March 30, fld will be discont. 24" rot. bcn will cont to oper and will be equipped with red course lgts. (3-8)

RAWLINS ARPT: Use new ENE/WSW and N/S Strips only. (1-5)

ROCK SPRINGS-RADIO: LF rng course monitoring device inop. (3-9)

SHERIDAN CO. ARPT: N/S Rnwy clsd to acft heavier than DC-3. (1-5)

SINCLAIR INT FLD: About March 30, fld will be discont. 24" rot. bcn will cont to oper and will be equipped with red course lgts. (3-8)

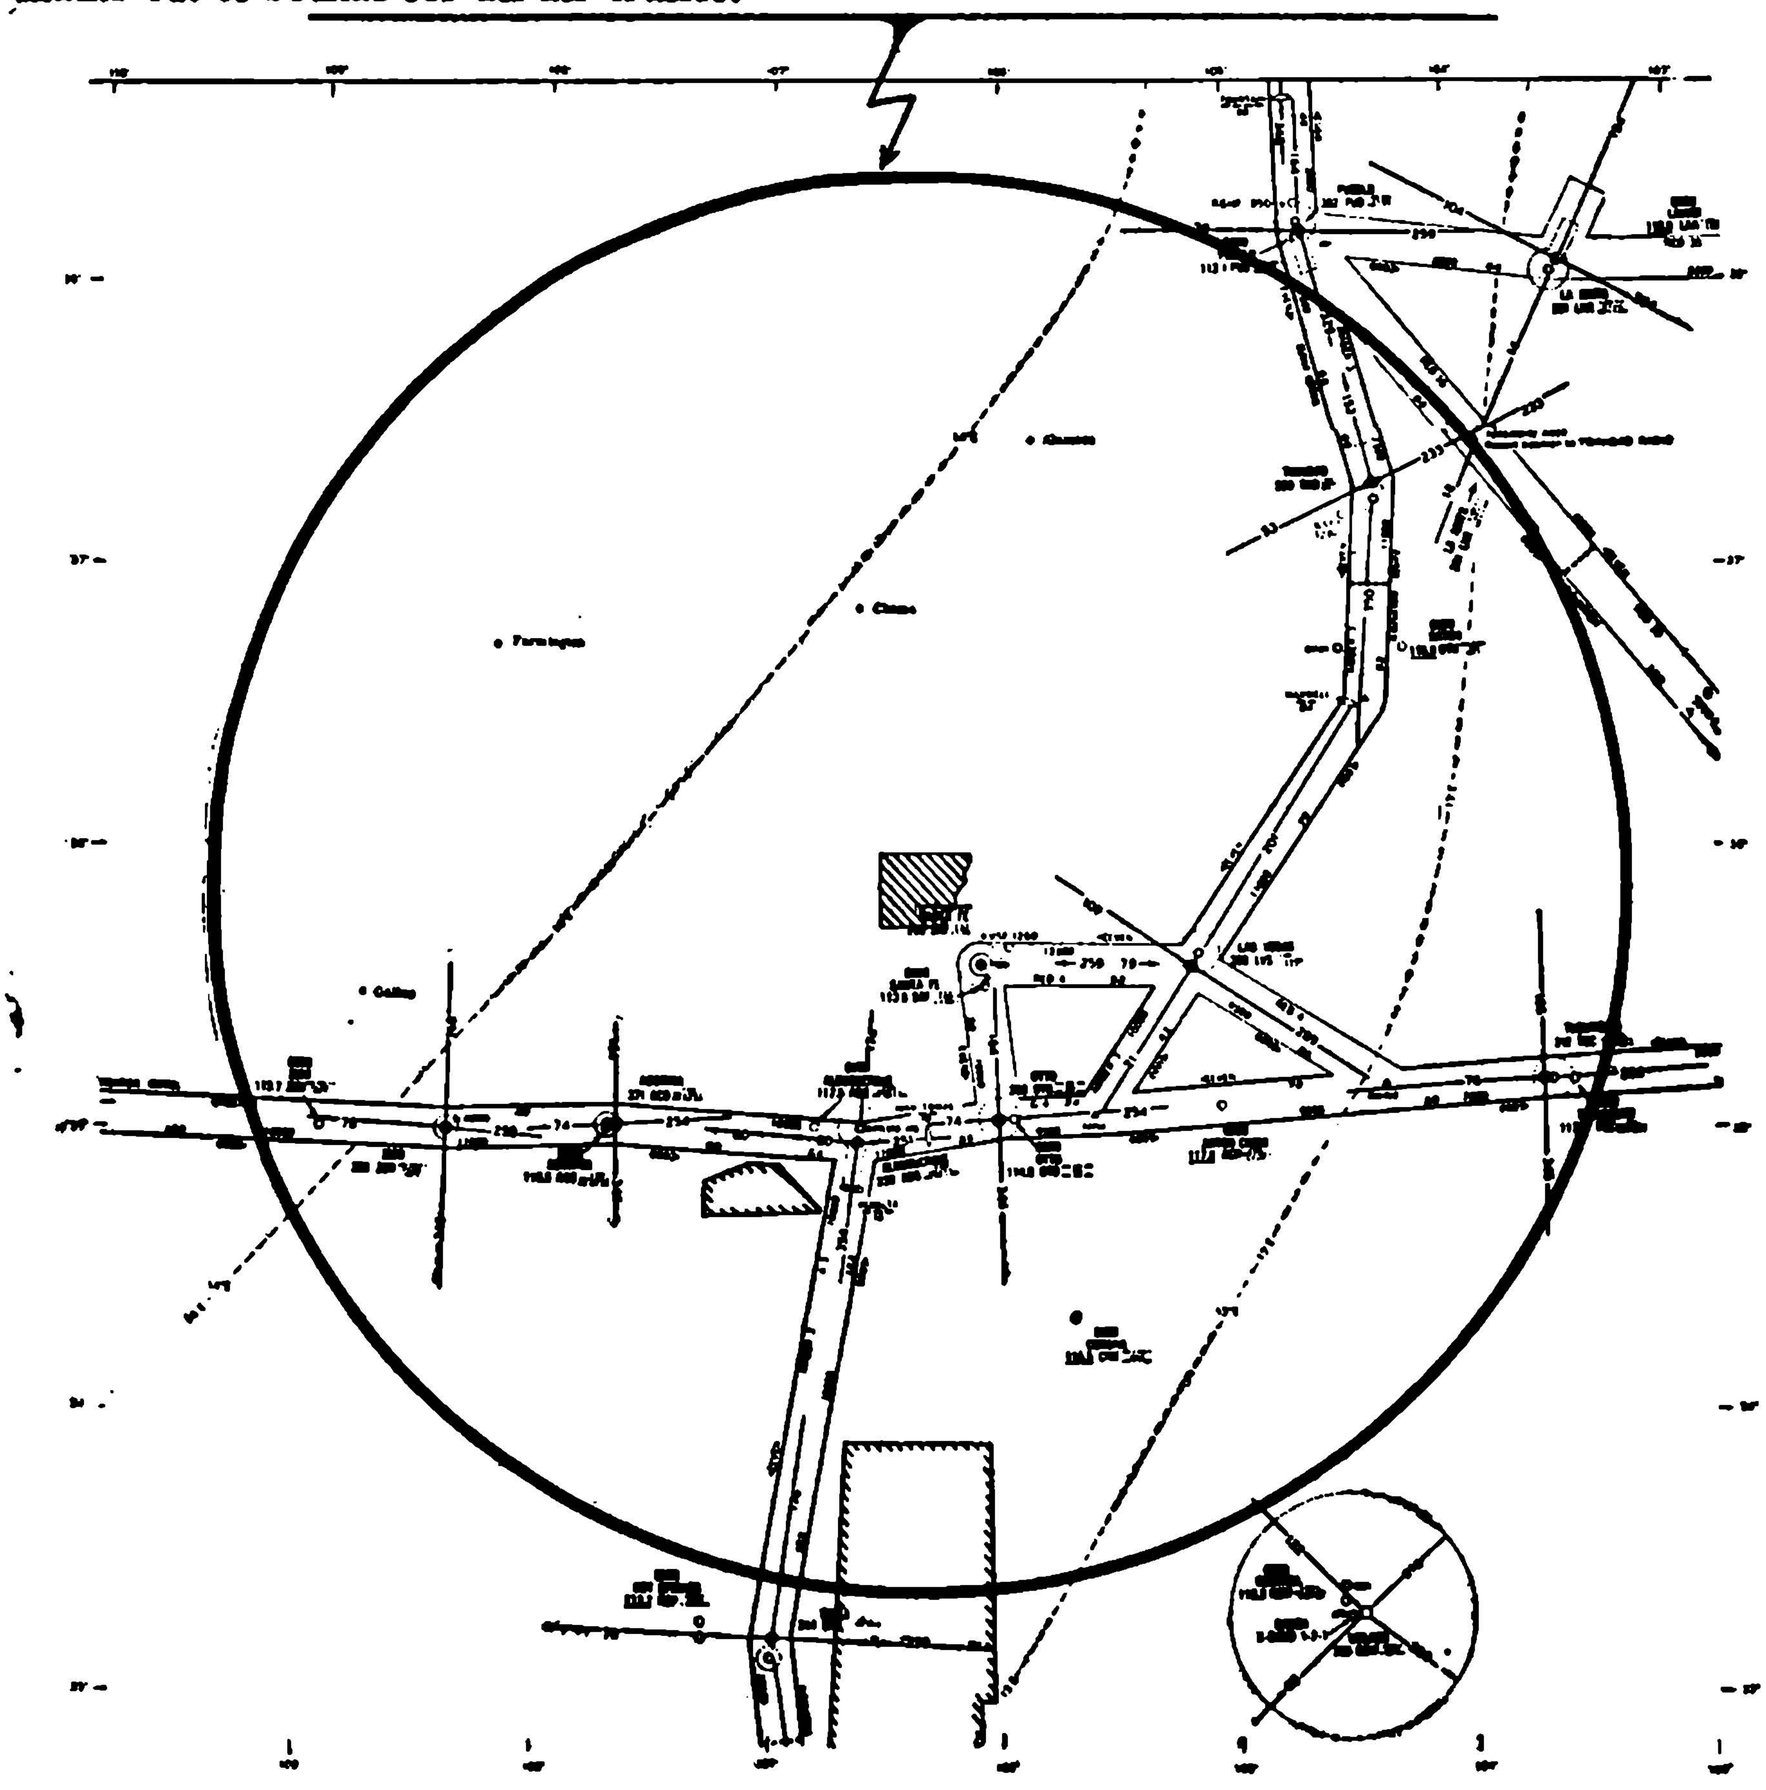
SPECIAL NOTICES

AIR DEFENSE AREAS

ALBUQUERQUE AIR DEFENSE AREA (LOS ALAMOS): Effective Date March 15, 1950. In the interest of safety, all airmen proposing to fly within 150 nautical miles (172 statute miles) of Los Alamos, New Mexico at an altitude greater than 10,000 feet MSL or more than 4,000 feet above the immediate terrain, whichever is higher, are encouraged to file flight plans, preferably IFR, with the appropriate CAA facility. Failure to do so may result in in-flight identification by fighter aircraft. The existing prohibited area in the immediate vicinity of Los Alamos remains out of bounds for all air traffic.



NORTHEAST AIR DEFENSE AREA: Effective Date March 6, 1950. In the interest of safety, all airmen proposing flight which will approach the Boston, New York or Washington domestic Air Route Traffic Control boundaries from the Atlantic Ocean area between Norfolk, Virginia, and Limestone, Maine, are encouraged to file flight plans, preferably IFR, with the appropriate facility. Similarly, aircraft flying locally or coastwise in the same area, more than 20 nautical miles (23 statute miles) seaward from the shoreline are encouraged to cooperate in the same manner as outlined above. Failure to file flight plans as outlined may result in in-flight identification by fighter aircraft.

NOTE: Aircraft operating within the continental limits of the United States or in the off-shore area less than 20 nautical miles (23 statute miles) from the coast-line are not affected by the above.
